# 1. Document control

# 1.1. Governance

Document title	Batchelor Local Emergency Plan
Contact details	NT Emergency Service, Planning and Preparedness Command
Approved by	Territory Controller
Date approved	15 December 2014
Document review	Annually
TRM number	04:D23:65392

# 1.2. Version history

Date	Version	Author	Summary of changes
15/12/2014	1	John McRoberts	First version
04/11/2015	2	Reece P Kershaw	Reviewed and updated
30/12/2016	3	Kate Vanderlaan	Reviewed and updated
28/11/2018	4	Travis Wurst	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
20/01/2020	5	Michael Hebb	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
17/11/2020	6	Travis Wurst	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
13/01/2021	7	Janelle Tonkin	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
13/06/2023	8	Travis Wurst	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate

Disclaimer: Every effort has been made to ensure that the information contained within this plan is accurate and where possible reflects current best practice. However, the Northern Territory Emergency Service does not give any warranty or accept any liability in relation to the content of material contained in the document.

# 2. Acknowledgement of Country

The Northern Territory Police, Fire and Emergency Services acknowledges the First Nations people throughout the Northern Territory, from the red sands of Central Australia to the coastal people in the Top End.

We recognise their continuing connection to their lands, waters and culture. We also pay our respects to the Aboriginal and Torres Strait Islander people with whom we work and who we serve and protect.

We pay our respects to the Aboriginal and Torres Strait Islander cultures, and to their leaders past, present and emerging.

## 3. Introduction

## 3.1. Purpose

The purpose of this Plan is to describe the emergency management arrangements for Batchelor Locality (the Locality).

## 3.2. Application

This Plan applies to the Batchelor Locality.

# 3.3. Key considerations

The Emergency Management Act 2013 (the Act) is the legislative basis for emergency management across the Northern Territory (NT). The Act reflects an all hazards approach to emergency and disaster events, natural or otherwise. It provides for the adoption of measures necessary for the protection of life and property from the effects of such events.

The Act defines the emergency management structures, roles and responsibilities for the NT and, in conjunction with the Territory and Regional Emergency Plan(s), form the basis for this Plan.

#### This Plan:

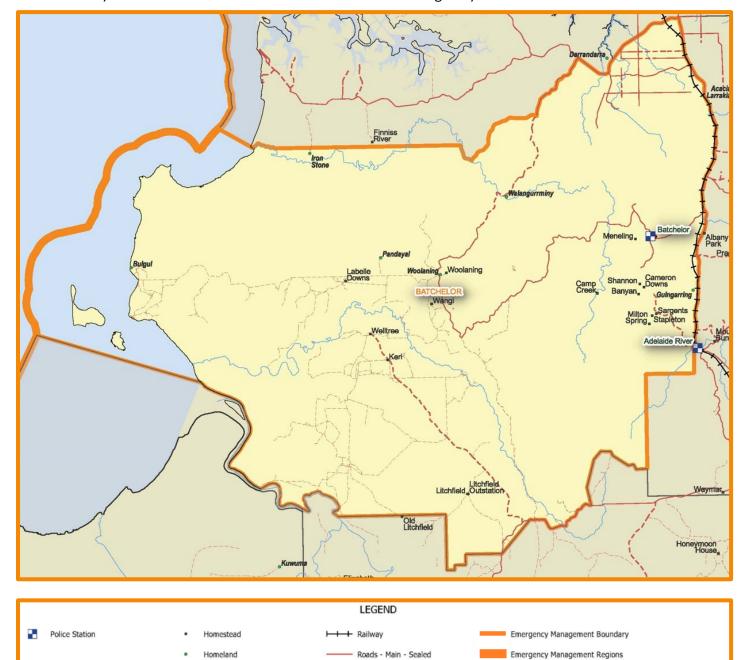

- confirms appointment of a Local Emergency Controller
- confirms establishment of the Local Emergency Committee (LEC)
- assesses hazards most likely to affect the community
- specifies control and coordination arrangements for mobilisation of local and, if necessary regional, resources
- identifies roles and responsibilities of key stakeholders
- details specific emergency response procedures for the higher risk situations.

# 4. Locality context

This Plan complements the Northern Regional Emergency Plan<sup>1</sup> as it relates to the Locality. For further information on the hierarchy of plans, refer to the Territory Emergency Plan<sup>2</sup>. The Locality covers approximately 4735 square kilometres (km) and is located approximately 100 km south of Darwin and forms part of the Northern Region, as defined by the Territory Emergency Plan.

The population of the locality fluctuates between 2,700 and 3,700, the main population centre being the town of Batchelor.

The Locality is located 98 km south of Darwin via the Stuart Highway.

Roads - Main - Unsealed Roads - Track Watercourses - Major

<sup>&</sup>lt;sup>1</sup> More information can be found at: <a href="https://www.pfes.nt.gov.au/emergency-service/publications">https://www.pfes.nt.gov.au/emergency-service/publications</a>

 $<sup>^2\,\</sup>text{More information can be found at:}\,\underline{\text{https://www.pfes.nt.gov.au/emergency-service/emergency-management}}$ 

### 4.1. Climate and weather

The Locality experiences similar weather conditions which occur throughout the Top End of the NT. There is a distinct Wet Season (October to April) and Dry Season (May to September). Compared to Darwin, temperatures tend to be slightly higher during the Wet Season and slightly lower during the Dry Season. The Locality's average annual rainfall is approximately 1,700 millimetres.

## 4.2. Geography

The Locality covers the full spectrum of topography from coastal plains through to open woodland and rain-forest escarpment relief. There are three major river systems in the Locality being Finniss River, Reynolds River and Adelaide River.

## 4.3. Sacred sites

The Aboriginal Areas Protection Authority (AAPA) is a statutory body established under the *Northern Territory Aboriginal Sacred Sites Act 1989* and is responsible for overseeing the protection of Aboriginal sacred sites on land and sea across the NT.

A sacred site is defined by the *Aboriginal Land Rights (Northern Territory) Act 1978* (Cth) as being 'a site that is sacred to Aboriginals or is otherwise of significance according to Aboriginal tradition'. Sacred sites are typically landscape features or water places that are enlivened by the traditional narratives of Aboriginal people.

AAPA requests notification of any action that may have affected a sacred site.

For more information on sacred sites relevant to this Locality, or to report an action that may have affected a sacred site, contact AAPA on (08) 8999 4365 or via email at enquiries.aapa@nt.gov.au.

## 4.4. Sites of conservation

There are no sites of conservation significance for this Locality, for further information about these sites contact the Department of Environment, Parks and Water Security<sup>3</sup> (DEPWS)

#### 4.5. Tourism

Tourism is also a major economic contributor to the Locality, particularly throughout the months of May to October. Most of the tourist activity occurs within the Litchfield Park with additional facilities being provided in Batchelor itself.

# 4.6. NT and local government

In March 2019, the NT Government (NTG) implemented 6 regional boundaries across the NT to strengthen the role of the Regional Network Group and align service delivery and reporting. This Locality sits within the Top End Boundary.

NTG agencies that have a presence in the Locality include:

- NT Police, Fire and Emergency Services (NTPFES)
  - NT Police Force (NTPF) (police station)
  - Batchelor Fire and Emergency Response Group (FERG)
- Bushfires NT (BFNT) (Batchelor, Adelaide River, Tortilla Volunteer Bushfire Brigade (BART))
- NT Parks and Wildlife
- Department of Health (DoH)

<sup>&</sup>lt;sup>3</sup> More information can be found at: <a href="https://nt.gov.au/environment/environment-data-maps/important-biodiversity-conservation-sites/conservation-significance-list">https://nt.gov.au/environment/environment-data-maps/important-biodiversity-conservation-sites/conservation-significance-list</a>

- Batchelor Health Centre
- Department of Education (DoE)
  - Batchelor Area School
  - Batchelor Institute of Tertiary Education
  - Batchelor Outdoor Education Centre

Batchelor is within the Coomalie Community Government Council (CCGC) region.

# 4.7. Building codes

Buildings and construction in the Locality are subject to the *Building Act 1993* and the *Building Regulations 1993*.

## 4.8. Land use

Batchelor has the following land usage:

- pastoral
- education
- residential
- freehold
- parks/reserves
- mining tenements
- · crown lease.

## 4.9. Power generation and distribution

All power supplied to Batchelor comes from Channel Island power station in Darwin. Within the Batchelor Locality there are 2 operational solar farms situated on Batchelor Road, Solar Farm No.1 and Solar Farm No.2. The solar farms are currently managed by Ente Nazionale Idrocarburi on behalf of owner British Solar Renewables.

## 4.10. Water services

Batchelor is supplied from 3 bores into 2 water tanks, Major Tank and Hill Top Tank.

#### 4.11. Health infrastructure

The Batchelor Primary Health Centre has the capacity to provide emergency medical aid in addition to routine health treatment and has a fully equipped ambulance station. Serious medical cases are required to be evacuated to Darwin. Patients can be evacuated either via road or air.

# 4.12. Emergency service infrastructure

The Locality has the following emergency service infrastructure:

- police station and cells
- FERG building
- ambulance service is provided by the Batchelor Health Clinic Bush Ambulance
- CCGC.

# 4.13. Roads

Batchelor has the following main roads in the area:

- Stuart Highway
- Batchelor Road
- Crater Lake Road
- Litchfield Park Road.

During the Wet Season, all roads may be subject to flooding at various creek/river crossings and low lying areas.

# 4.14. Airports

The table below lists the airstrips in the Locality:

Name of the strip	Datum	Details (type, length, etc.)	Operator of the strip
Litchfield Station	13°26.'S 130°30E	Dimensions: 1600 meters (m) x 15 m Surface: natural (graded) Windsock: west end of strip Hazard: wallaby Lighting: nil Fuel Held: AVTUR/AVGAS	Managed by Tipperary Station – 08 8978 2403
Batchelor	13°04.'S 131°02E	Dimensions: 1600 m Windsock: middle of strip, north east side Hazard: nil Lighting: nil Fuel held: AVGAS/JETA1	Department of Infrastructure, Planning and Logistics (DIPL)
Channel Point	13°09.'S 130°08E	Dimensions: 2060 m x 120 m Surface: black soil Windsock: nil Hazard: dry season emergency only Lighting: nil Fuel held: nil	Caretaker – Ron Stockley
Coomalie	13°00.'S 130°07E	Dimensions: 943 m x 20 m Surface: sealed Windsock: nil Hazard: nil Fuel held: nil	BFNT

## 4.15. Rail infrastructure

The Darwin to Adelaide Railway transits through the NT terminating in the vicinity of East Arm Port. At least 12 trains use the line each week, carrying either passengers or a variety of freight including hazardous chemicals/materials. Rail maintenance crews also operate various vehicles on the line at different times.

There are rail crossings near the Stuart Highway on Crater Lake Road and Batchelor Road. In the event of a major incident, many railway authorities have response capabilities and can provide specialised assistance, advice and support.

The various railway organisations are:

Australasian Railway Corp	Managed by both the NT and South Australian Governments	
One Rail (Previously Genesee & Wyoming Inc.)	Rail operator	
Great Southern Railway	Passenger service operator	
Australian Southern Railroad	Train control operator of freight trains	
Pacific National	Locomotive operator, including locomotive crews and terminal operators	
BJB Joint Venture	Track maintenance	
Evans Deacon Industries	Maintenance of rolling stock	
All contact with these authorities is to be through the Regional Controller.		

## 4.16. Telecommunication

Telecommunications are available across the Batchelor township via a combination of landline, mobile and satellite communications delivery. Telstra service within the Locality and limited coverage in rural area. Optus service is limited within Litchfield National Park, Telstra service is not available within the park.

## 4.17. Local radio stations

Batchelor does not have a local radio station, but has the following broadcasts:

- 97.3 FM Radio Rum Jungle
- 92.1 FM Australian Broadcasting Corporation (ABC) Radio National.

## 4.18. Medically vulnerable clients

The Batchelor Health Centre has a list of medically vulnerable clients and it is updated regularly. There are no aged care facilities in the Batchelor area, but the CCGC also provides services for aged care residents.

# 5. Prevention

# 5.1. Emergency risk assessments

The Batchelor LEC are responsible for undertaking appropriate activities to prevent and mitigate the impact of emergencies in their Locality.

# 5.2. Disaster hazard analysis and risk register

The LEC has identified the following hazards for the Locality:

- air crash
- emergency animal disease
- · emergency plant pest or disease
- fire (within Gazetted Area)
- fire (within Fire Protection Zone)
- flood
- hazardous material
- heatwave
- rail crash
- road crash
- tropical cyclone.

These hazards have been rated against the National Disaster Risk Assessment Guidelines (NERAG):

Hazard	Overall consequence	Overall likelihood	Risk rating
Air crash	Minor	Unlikely	Low
Emergency animal disease	Minor	Unlikely	Low
Emergency plant pest or disease	Minor	Rare	Low
Fire (within Gazetted Area)	Minor	Likely	Medium
Fire (within Fire Protection Zone)	Moderate	Likely	High
Flood	Minor	Rare	Low
Hazardous material	Minor	Rare	Low
Heatwave	Minor	Rare	Low
Rail crash	Minor	Unlikely	Low
Road crash	Minor	Likely	Medium
Tropical cyclone	Moderate	Unlikely	Medium

# 5.3. Hazard specific prevention and mitigation strategies

Prevention and mitigation relates to measures to reduce exposure to hazards and reduce or eliminate risk. Actions include identifying hazards, assessing threats to life and property, and from these activities, taking measures to reduce potential loss of life and property damage.

The cornerstone of mitigation is guided and coordinated risk assessments, which should involve all potentially affected members of a community. Strategies are developed based on a thorough understanding of hazards identified in emergency risk planning and their interaction with all aspects of society. Specific prevention and mitigation strategies for identified hazards can be found at **Annex C**.

# 6. Preparedness

Arrangements to ensure that, should an emergency occur, all resources and services that are needed to provide an emergency response and or recovery can be efficiently mobilised and deployed.

## 6.1. Planning

NT emergency plans<sup>4</sup> are required by the Act and are maintained at a Territory, regional and local level. Arrangements in plans aim to be flexible and scalable for all hazards. The planning process enables agreements to be reached between people and organisations in meeting communities' needs during emergencies. The plan becomes a record of the agreements made by contributing organisations to accept roles and responsibilities, provide resources and work cooperatively.

The LEC is responsible for the annual review of operations and the effectiveness of the Local Emergency Plan, supported by the NT Emergency Service (NTES) Planning and Preparedness Command.

## 6.2. Emergency resources and contacts

The LEC are responsible for maintaining the emergency resource register and LEC contact list. Local emergency management stakeholders are to advise the Local Controller of changes to resource holdings, operational response capabilities and key personnel contacts. Emergency resource and LEC contact list for each locality are available on Web-based Emergency Operations Centre (WebEOC).

# 6.3. Training and education

The Act provides the legislative requirement for those involved in emergency management activities to be appropriately trained. Training and education activities are undertaken to ensure agencies are familiar with and understand the NT emergency management arrangements, as well as the relevant controlling and hazard management authorities for identified hazards.

The NTES Learning and Development Command is responsible for emergency management training across the NT. Online and face to face training is scheduled throughout the year.

# 6.4. Community education and awareness

Effective and ongoing community education and preparedness programs that emphasise to communities the importance of practical and tested emergency plans and safety strategies is essential. Empowering communities to act in a timely and safe manner will minimise the loss of life, personal injury and damage to property and contribute to the effectiveness of any warning system.

List of available activities and initiatives in the area:

- NTES hazard briefings
- NTES Paddy Program
- NT Fire and Rescue Service (NTFRS) Smart Sparx Program
- Red Cross Pillowcase Program
- St Johns Ambulance First Aid in schools program.

### 6.5. Exercises

Local level exercises are a key measure for testing the effectiveness of the local emergency plan and should involve all relevant stakeholders. Exercises ensure that the plan is robust and understood, and that capabilities and resources are adequate. Exercises are conducted if the plan has not been enacted since the last review, or substantial changes have occurred, including:

<sup>&</sup>lt;sup>4</sup> More information can be found at: https://pfes.nt.gov.au/emergency-service/publications

- legislative changes
- major changes have occurred in the areas of key personnel, positions or functions across prevention, preparedness, response and recovery
- new or emerging hazards/risks have been identified.

The NTES Planning and Preparedness Command have developed resources that outlines the process to develop the exercise concept in designing, planning, conducting, facilitating, participating or evaluating exercises.

# 7. Response

Actions taken in anticipation of, during and immediately after an emergency to ensure that its effects are minimised and that people affected are given immediate relief and support.

## 7.1. Control and coordination

Arrangements for response are based on pre-agreed roles and responsibilities for stakeholders. When the scale and complexity of an event is such that resources of the community are depleted a number of arrangements are in place for assistance from the region, the Territory and/or the Australian Government. Pathway for assistance is through the Regional Controller.

## 7.2. Local Emergency Controller

In accordance with section 76 of the Act, the Territory Controller or their delegate (section 112 of the Act) can appoint a Local Emergency Controller (Local Controller). The Local Controller is the Officer in Charge of Batchelor Police Station. The Local Controller is subject to the directions of the Regional Controller. The powers, functions and directions of the Local Controller can be found in sections 77, 78 and 79 of the Act.

# 7.3. Local Emergency Committee

In accordance with section 80 of the Act, the Territory Controller has established a Batchelor Local Emergency Committee (LEC). The Local Controller is Chair of the LEC and remaining membership consists of representatives from NTG and non-government entities within the Locality. Division 11 of the Act specifies the establishment, functions, powers; membership and procedure requirements of a LEC.

# 7.4. Emergency Operations Centre/Local Coordination Centre

NT Emergency Management Arrangements	Controlling Authority Arrangements
Emergency Operations Centre (EOC) (Territory and Regional level)	Incident Control Centre (ICC)
Local Coordination Centre (LCC) (local level)	Incident Control Point (ICP)

LCCs will be established as required by Local Controllers to provide a central focus to the management, control and coordination of emergency operations in the Locality. When activated, the functions of the LCCs are:

- information collection and dissemination
- preparation and issue of official warnings and advice to the public
- coordination of the provision of resources required in the Locality
- submitting requests for resources through the Regional Controller to the Territory EOC where applicable
- dissemination of information to the media and general public.

The LCC for this locality is the Batchelor Police Station. The Regional EOC will be located in Darwin at the Peter McAulay Centre. Agencies and functional groups may establish their own coordination centres to provide the focal point for the overall control and coordination of their own agency resources. Liaison Officers from functional groups and support agencies will attend the EOC as required.

ICCs will be established as required by a controlling authority to provide an identified facility for the management of all activities necessary for the resolution of an incident.

An ICP is normally located near the incident in its early stages but may be relocated to an ICC where more permanent and convenient facilities and services are available.

## 7.5. WebEOC

WebEOC is a critical information management system used throughout the NT for emergency management activities. The system is owned and maintained by the NTPFES. The online platform is used for the coordination of multi-agency response to, and recovery from, an emergency event. WebEOC also enables real-time information sharing across all NTG agencies involved in emergency management activities.

## 7.6. Situation reports

It is essential for effective control and coordination of emergency management operations that the Local Controller is able to gather and collate relevant information relating to the emergency from regular, concise and accurate situation reports (SITREPs).

LEC members are to provide SITREPs at agreed times to enable the preparation of a consolidated report which will be distributed to all committee members and other relevant authorities. This may be achieved through WebEOC.

## 7.7. Activation of the Plan

This plan has 5 stages of activation. These stages are designed to ensure a graduated response to hazardous events, thereby reducing the possibility of under or over reaction by the emergency management agency. The stages are:

Stage 1	Alert	This stage is declared when the Local Controller receives warning of an event which, in their opinion, may necessitate an emergency management response
Stage 2	Standby	This stage is declared when the Local Controller considers an emergency operation is imminent. During this stage passive emergency measures are commenced.
Stage 3	Activation	This stage is declared when active emergency measures are required.
Stage 4	Stand-down response operations and transition to Recovery	Stage 4 occurs when the Local Controller and Local Recovery Coordinator agree to transition to recovery (if required) in accordance with the transitional arrangements of this Plan.
Stage 5	Recovery	This stage is called if ongoing recovery operations and coordination is required.

The stages identified provide for a sequential response. However, it may be necessary because of the degree of warning and speed of onset of an event, for the Local Controller to skip the actions required under stage 1 or 2.

## 7.8. Stakeholder notifications

Upon activation of the Plan the following personnel are to be advised as a matter of urgency:

- all available members of the LEC
- Northern Regional Controller
- NTES Territory Duty Officer (TDO).

## 7.9. Official warnings and general public information

Official warnings and general public information will be broadcast to the Locality through the following means:

- radio broadcast
- television news broadcast
- SecureNT website and social media broadcasts and updates.

Official warnings are issued by the Bureau of Meteorology (the Bureau), Geoscience Australia, BFNT and the NTPFES.

Emergency Alert is a national telephony-based emergency warning system that can deliver warning messages to landlines and mobile handsets based on the service address and mobile handsets based on the last known location of the device. Authority to utilise the Emergency Alert may be given by virtue of the pre-approval of a hazard specific emergency plan or under the Territory Emergency Plan.

The approval for the release of an Emergency Alert message can only be authorised by one of the following:

- Territory Controller
- Director, NTES
- Regional Controller
- Chief Fire Officer, NTFRS
- Deputy Chief Fire Officer, NTFRS
- Executive Director, BFNT
- Chief Fire Control Officer, BFNT.

The Standard Emergency Warning Signal (SEWS) is an audio alert signal (wailing siren) which may be broadcast on public media to draw attention to the fact that an urgent safety message is about to be made. Generally, SEWS is only played before announcements concerning significant emergencies where emergency management arrangements should be activated as a result.

Control and hazard management authorities may have pre-planned use of SEWS for non-weather related events, through a pre-approved hazard-specific emergency plan.

The approval for the release of a SEWS message can only be authorised by one of the following:

- Territory Controller
- Director, NTES
- Manager Hazard Preparedness and Response NT (the Bureau) (for weather and flood-related events).

Warning and information messages for general public are authorised by the Regional or Incident Controller. The dissemination of such emergency warnings and information is to be by whatever means are appropriate and available at the time.

## 7.10. Australasian Inter-Service Incident Management System

The Australasian Inter-Service Incident Management System (AIIMS)<sup>5</sup> is a robust incident management system that enables the seamless integration of activities and resources of a single agency or multiple agencies when applied to the resolution of any event.

## 7.11. Closure of schools

The decision to close schools due to an impending threat will be made by the Chief Minister on advice from the Territory Emergency Management Council (TEMC). When the nature of an event demands an immediate response, local authorities will take the appropriate steps to ensure the safety to the public. This action may include the temporary closure of a school to begin preparations, pending formal closure of the school by the Chief Minister for the remainder of the event.

The decision to reopen schools will be made by the Chief Minister on advice from the Chief Executive, DoE.

## 7.12. Closure of government offices

The decision to close government offices due to an impending threat will be made by the Chief Minister on advice from the TEMC. When the nature of an event demands an immediate response, local authorities should take all appropriate steps to ensure public safety and the protection of property.

The decision to reopen government offices will be made by the Chief Minister on advice from the TEMC.

All NTG agencies are to have an Emergency Preparedness Plan which sets out their processes for closing down their offices once approval has been given. This should have clearly articulated employee guidelines to ensure employees know when they are authorised to leave and are required to return to work.

# 7.13. Emergency shelters or strong buildings

Emergency shelters and places of refuge are buildings or structures that provide people with a place of protection and shelter during a disaster or emergency event such as a cyclone, flood or fire.

The recognised emergency shelter within the Locality is:

Batchelor Outdoor Education Unit – Dining Hall
 150 capacity (not to be used in cyclone).

There are no private buildings built to the wind terrain code in Batchelor, the shelters are not designed as cyclone shelters.

The DoE in conjunction with the NTPF and the shelter owners are responsible for the management of emergency shelters during an emergency event.

The responsibilities of the emergency shelter manager are:

- the provision of personnel to staff and operate the emergency shelters at such times as they are activated
- the maintenance of effective liaison with other stakeholders with responsibilities relating to shelters, in particular the NTPF.

Emergency shelters are opened under the direction of the Territory or Regional Controller in consultation with the Shelter Group (DoE). Emergency shelters will not normally operate for more than 48 hours.

The timing of the opening of emergency shelters will be dependent upon the severity of the impending incident, the numbers to be sheltered, the time of day the incident is expected to impact and the period of time the emergency shelters are likely to be occupied. The announcement that emergency shelters are open in the Locality will be made by radio broadcast and social media, and will include emergency shelter rules such as no pets or alcohol being permitted in shelters and that food will not be provided.

<sup>&</sup>lt;sup>5</sup> More information can be found at: https://pfes.nt.gov.au/emergency-service/publications

### 7.14. Evacuation

Evacuation is a risk management strategy that can be used to mitigate the effect of an emergency or disaster on a community. It involves the movement of people to a safer location and their return. The decision to evacuate a community, including establishing an evacuation centre, is not taken lightly as it represents significant resource and financial implications.

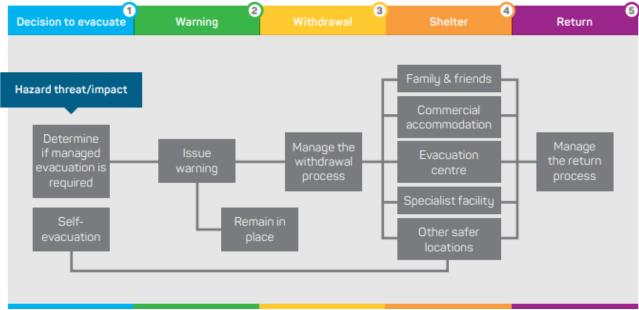

Evacuation of the Locality will be considered as a last resort. Where an evacuation is required the TEMC, in consultation with the Regional Controller, Local Controller and the LEC, will arrange emergency accommodation and transport, as necessary, through the relevant functional group/s.

An evacuation guideline for the Locality can be found at **Annex D**.

Evacuation is a complex process that has 5 distinct steps:

- 1. Decision
- 2. Warning
- 3. Withdrawal
- 4. Shelter
- 5. Return.

Each step is linked and must be carefully planned and carried out in order for the entire process to be successful. Given an evacuation centre will only be opened as a part an evacuation, it is vital to have an understanding of the 5-step process.

Source: Australian Institute of Disaster Resilience, Evacuation Planning Handbook, 2017.

### 7.15. Identified evacuation centres

An evacuation centre is designed to accommodate people for short to medium periods of approximately 4 to 6 weeks, although this figure may vary.

An evacuation centre will provide some or all of the following services:

- meals
- beds
- linen
- personal support
- medical services (or access to them)
- assistance accessing finances and recreational activities.

An evacuation centre implies the provision of these services in contrast to an emergency shelter, in which people are expected to be self-sufficient.

For further information on evacuation centres / shelters management, refer to the NT Evacuation Centre Field Guide available on WebEOC.

# 7.16. Register. Find. Reunite Registration and inquiry system

Australian Red Cross, in partnership with the Australian Government Attorney-General's Department, has developed an improved system to help reunite families, friends and loved ones separated by an emergency. This system is called Register.Find.Reunite<sup>6</sup>.

This system can be initiated by either the Territory or Regional Controller without the national system being activated. Any activation of this system should occur in consultation with the Welfare Group in the first instance.

# 7.17. Impact assessment

Immediately after an emergency event, there is a need to identify and assess impacts to inform short and long-term recovery priorities. Comprehensive assessment of all impacts is a vital component of emergency response activities. Guidelines for the conduct of rapid assessments in the NT, including the establishment of dedicated Rapid Assessment Teams (RATs) to collect data in the field, have been developed.

The Survey, Rescue and Impact Assessment Group, led by the NTPFES, is responsible for coordinating rapid impact assessments. At the local level, Local Controllers should contact the Survey, Rescue and Impact Assessment Group lead to discuss impact assessments if deemed appropriate.

<sup>&</sup>lt;sup>6</sup> More information can be found at: https://register.redcross.org.au/

# 8. Recovery

The coordinated process and measures for supporting emergency-affected communities in the reconstruction of physical infrastructure and restoration of the social, economic and natural environments.

# 8.1. Local Recovery Coordinator and Coordination Committee

When a region and/or locality has been affected by an event, the Regional Recovery Coordinator may appoint a Local Recovery Coordinator in accordance with section 87 of the Act. The Local Recovery Coordinator will establish a Local Recovery Coordination Centre (LRCC) drawing from membership of the LEC and other relevant members of the community as needed. The Local Recovery Coordinator reports directly to the Regional Recovery Coordinator.

Local Recovery Coordinator and Committee functions, powers and directions are established in Division 12 and 13 of the Act respectively.

# 8.2. Transitional arrangements

The transition from response to recovery coordination reflects the shift from the protection of life and supporting the immediate needs of the community to establishing longer term, more sustainable support structures.

The transition to recovery coordination occurs after the completion of the transition checklist and at a time agreed by the Territory Controller and Territory Recovery Coordinator in accordance with the Territory Emergency Plan.

Transition will occur when the Territory Recovery Coordinator is satisfied that the following has occurred:

- the Territory Controller has briefed the TEMC and the Territory Recovery Coordinator
- the Regional Controller has briefed the Regional Recovery Coordinator
- where there is significant changeover of personnel, the EOC planning operations and logistics sections have briefed incoming recovery planning, operations and logistics staff.

The Regional Recovery Coordinator will ensure all functional group leaders, agencies, support groups and other relevant stakeholders are notified prior to the transition to recovery. This notification is to include changes to relevant contact details and other pertinent information.

An example of response and recovery activities can be found at **Annex E**.

# 9. Debrief

Debrief processes embed continuous improvement into the delivery of emergency management activities. Consistent approaches to lessons learned encourage adaptability, and flexibility across all levels of government. Sharing of knowledge and experiences throughout emergency events assists with ongoing continuous improvement of people and organisations involved.

The NTG implements a lessons learned approach recognising the positive impact on organisational culture commensurate with increasing opportunities to achieve emergency management goals. Whilst lessons learned often begins in one agency through an internal debrief process, those lessons learned are transferable across multi-agencies.

During any operational response, personnel involved are encouraged to record activities where there are lessons to be learned. Activities can include decision making and consequential responses. Where decisions are made by an Incident Controller, Incident Management Team (IMT) member or a functional group member, those decisions should be recorded in a Decision Log (WebEOC). Decision Logs can be referred to as part of the debrief process.

# 10. Related references

The following references apply:

# 11. Annexures

Annex A Functional groups - roles and responsibilities

Annex B Functions table

Annex C Prevention, mitigation strategies and action plans for identified hazards

Annex D Evacuation guideline

Annex E Summary of response and recovery activities

# 11.1. Annex A: Functional groups - roles and responsibilities

Functional group	Local contact
Biosecurity and Animal Welfare	Malak Malak Rangers/Department of Industry, Tourism & Trade (DITT)
Critical Goods and Services	Batchelor Store/ DITT
Digital and Telecommunications	Department of Corporate and Digital Development (DCDD)
Emergency Shelter	Batchelor Institute of Tertiary Education/Batchelor Primary School
Engineering	DIPL
Industry	DITT
Medical	Batchelor Primary Health Centre
Public Health	Batchelor Primary Health Centre
Public Information	Department of the Chief Minister and Cabinet (DCMC)
Public Utilities	PAWC Essential Services Officer (ESO)
Survey, Rescue and Impact Assessment	NTPF
Transport	DIPL
Welfare	Department of Territory Families, Housing & Communities (TFHC)

Full details of functional group roles and responsibilities are detailed in the Territory Emergency Plan.

# 11.2. Annex B: Functions table

Emergency response and recovery functions with identified agencies/organisation/provider During an event some of these functions may be needed at a local level.

Functions	Agency/organisation/provider responsible
Animal/livestock management	Malak Malak Rangers
Anti-looting protection	NTPF
Banking services	DITT
Broadcasting: What radio stations provide announcements?	ABC Local Radio
Clearing of essential traffic routes	CCGC/DIPL
Clearing storm water drains	CCGC/DIPL
Clothing and household Items	TFHC
Community clean up	CCGC
Control, coordination and management	Designated Controlling Authority
Coordination to evacuate public	NTPF
Critical goods and services (protect/resupply)  • food  • bottle gas  • camping equipment  • building supplies	DITT
Damaged public buildings: coordination and inspections	DITT
Disaster Victim identification capability	NTPF
Emergency Alerts	NTPFES/BFNT
Emergency catering	TFHC
Emergency food distribution	TFHC
EOC, including WebEOC	NTPF/DCMC
Emergency shelter, staff, operations and control	Batchelor Institute/Batchelor Primary School

Functions	Agency/organisation/provider responsible
Evacuation centre - staffing, operations and control	THFC
Financial relief/assistance	DCMC
Disaster Recovery Funding Arrangements	
Identification of suitable buildings for shelters	LEC
Interpreter services	Aboriginal Interpreter Service
Management of expenditure in emergencies	Controlling Authority and any activated functional groups at the direction of the Controlling Authority
Medical services	Batchelor Primary Health Care
Network communications (IT): responders / public maintenance and restoration of emergency communication	DCDD/Telstra
Personal support	TFHC
Power: protection and restoration:	PAWC
Public messaging during response and recovery	NTPFES/the Bureau/DCMC
Public/Environmental Health (EH)	Batchelor Primary Health Care
<ul><li>management</li><li>All EH functions including water &amp;</li></ul>	
food safety	
Disease control	
Rapid impact assessment	NTPF
Recovery coordination	DCMC
Repatriation	As detailed in local emergency arrangements
Restoration of public buildings	DIPL/TFHC
Restoration of roads and bridges (council/territory) excluding railways	DIPL/CCGC
Road management and traffic control including public Information on road closures	CCGC/DIPL
Sewerage: protection and restoration	PAWC ESO

Functions	Agency/organisation/provider responsible
Survey	NTPFES
Traffic control	NTPF
Transport : commercial and public airport/planes, automobiles, buses	DIPL
Vulnerable groups	TFHC/DoH
Waste management	CCGC
Water (including drinking water): protection and restoration	PAWC ESO

# 11.3. Annex C: Prevention, mitigation strategies and action plans for identified hazards

## 11.3.1. Fire

Hazard		Controlling authority	Hazard management authority	
	Fire (within Gazetted Area)	NT Fire and Rescue Service	NT Fire and Rescue Service	
	Fire (within Fire Protection Zone)	Bushfires NT, Department of Environment, Parks and Water Security	Bushfires NT	

A fire hazard is an event, accidentally or deliberately caused, which requires a response from one or more of the statutory fire response agencies.

## A fire hazard can include, but not limited to:

Term	Definition
Structure fire	A fire burning part, or all of any building, shelter, or other construction.
Bushfire	An unplanned fire. It is a generic term that includes grass fires, forest fires and scrub fires. Bushfires are a natural, essential and complex part of the NT environment. The term bushfire is interchangeable with the term wildfire.
Vehicle fire	An undesired fire involving a motor vehicle.

#### **Agency Capabilities**

BFNT - Trained and equipped to combat bushfires only (also known as grassfires or wildfires). BFNT members are not trained or equipped to combat fires involving structures, vehicles or hazardous material.

NTFRS - Protects the Territorian community from emergencies involving fire, motor vehicle crashes and other dangerous situations, including hazardous materials and building collapse.

Under the Territory Emergency Plan BFNT and NTFRS are both the hazard management authority and controlling authority for fires within each of their jurisdictions. This means that either relevant agency is responsible for managing technical aspects of responding to a bushfire and commanding its resources through their Incident Controller. This means that if a fire is occurring within an Emergency Response Area (ERA) then the NTFRS is the Controlling and hazard management authority. If a fire is occurring within a Fire Protection Zone, then BFNT is the controlling and hazard management authority.

Across the NT, landowners are an essential part of the fire management process. Communication, cooperation and shared responsibility within the community, matched by a capacity to undertake self-protective measures, form the basis of successful fire management throughout the NT.

The NTFRS and BFNT identifies 3 classes of incidents and describes them in generic terms, as shown in the following table:

Incident classification	Description			
Level 1	Level 1 incidents are generally characterised by being able to be resolved through the use of local or initial response resources only.			
	Level 2 incidents may be more complex either in size, resources or risk. They are characterised by the need for:			
	<ul> <li>deployment of resources beyond initial response</li> </ul>			
Level 2	sectorisation of the incident or			
	<ul> <li>the establishment of function sections due to the levels of complexity</li> </ul>			
	a combination of the above.			
Level 3	Level 3 incidents are characterised by degrees of complexity that may require the establishment of divisions for effective management of the situation.			

#### Actions to be taken:

In instances where the Local Controller is required to perform a task or function, the controlling authority will contact the Local Controller. Tasks approved by the controlling authority's Incident Controller may include, but not limited to:

- liaison with key community stakeholders
- closure of roads or places
- fire cause or protection of potential area of origin
- post fire impact assessments.

## Prevention and preparative controls include, but are not limited to:

- a fire danger period is declared over large areas when climatic and seasonal conditions presents increased fire risk for a prolonged period of time. A fire danger period usually coincides with the accepted 'fire season' in an area. Broadly this is during the Australian summer months in central Australia and during the Dry Season further north. A permit to burn is required before using fire during a fire danger period in all zones
- a fire ban can be declared for up to 24 hours. A combination of factors are considered when
  declaring a fire ban period including forecast fire danger, ignition likelihood, hazards and
  resourcing. All permits to burn are revoked within the declared fire ban area
- a fire management area can be declared in an area where BFNT have identified heightened fire risk. A fire management plan can be prescribed for a fire management area, and the plan can require landowners to take action to prepare for, or prevent, the spread of fire
- additional fire regulations apply within NTFRS ERA and BFNT Fire Protection Zone. Permits to burn are required throughout the entire year inside an ERA or Fire Protection Zone and a minimum 4 m wide firebreak within the perimeter boundary of all properties and additional firebreaks around permanent structures and stationary engines is required within an Fire Protection Zone
- the BFNT Regional Fire Management Plan
- establishment of an IMT with liaison officers from other agencies to assist
- radio, television and social media posts.

#### Warnings and advice approval flow:

The Australian Warning System is a new national approach to information and warnings during emergencies like bushfire. The System uses a nationally consistent set of icons, like those below.

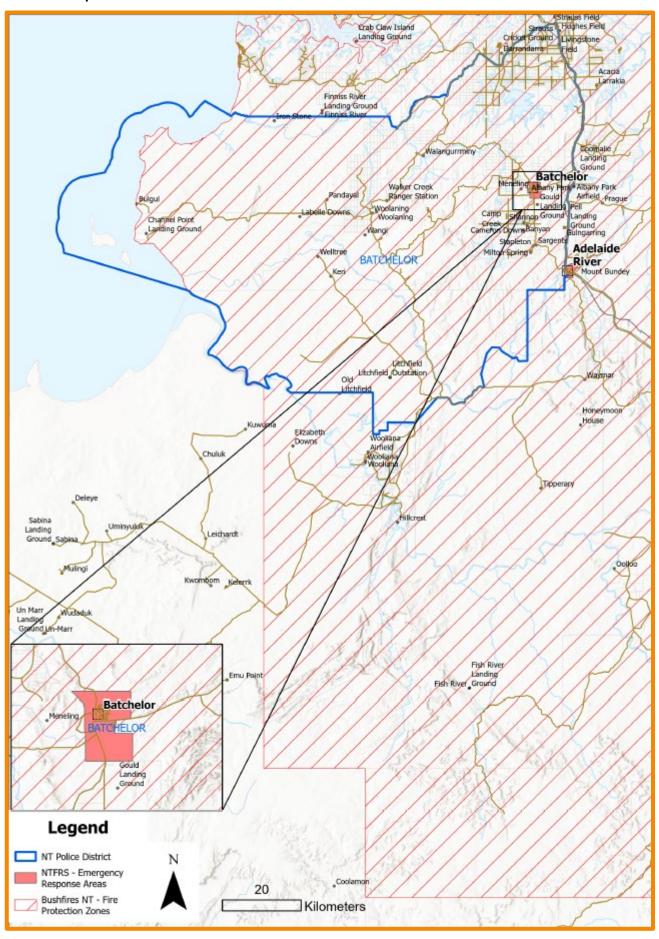

## There are 3 warning levels:

Warning level	Description
Advice (Yellow)	An incident has started. There is no immediate danger. Stay up to date in case the situation changes
Watch and Act (Orange)	There is a heightened level of threat. Conditions are changing and you need to start taking action now to protect you and your family
Emergency Warning (Red)	An Emergency Warning is the highest level of warning. You may be in danger and need to take action immediately. Any delay now puts your life at risk.

Each warning level has a set of action statements to give the community clearer advice about what to do. Calls to Action can be used flexibly across all 3 warning levels depending on the hazard.

All warnings and advice will be issued by the Incident Controller from the relevant controlling authority for fire (NTFRS or BFNT).

Fire ERA map - Batchelor

#### 11.3.2. Road crash

Hazard	Controlling authority	Hazard management authority	
Road Crash	NT Police Force	NT Fire and Rescue Service	

A road crash occurs when a vehicle collides with another vehicle, pedestrian, animal, road debris, or other stationary obstruction, such as a tree, pole or building. Road crashes often result in injury, disability, death, and or property damage as well as financial costs to both society and the individuals involved. Emergency services are frequently called on to extricate seriously injured casualties from their vehicles following road crashes. This is achieved by employing space creation techniques to create openings in the vehicle. These openings make it possible to administer first aid to the casualty and to remove them from the vehicle.

A number of factors contribute to the risk of collisions, including vehicle design, speed of operation, road design, weather, road environment, driving skills, fatigue, impairment due to alcohol or drugs, and behaviour, notably aggressive driving, distracted driving, speeding and street racing.

Responses to road crash incidents will be coordinated from the JESCC. NTFRS will respond as per predetermined response arrangements contained within the ICAD system for incidents occurring within an NTFRS ERA. For incidents occurring outside of an ERA, response will be approved by the rostered NTFRS TDO.

#### Prevention and preparative controls include, but are not limited to:

- radio, television and social media posts
- targeted road safety campaigns
- community engagement strategies
- training in PUASAR024 undertake road crash rescue delivered by NTES and NTFRS to NTPFES members.

### Public safety message process:

• NTPF Territory Duty Superintendent to approve public messaging and forward to NTPFES Media and Corporate Communications Unit for dissemination.

# 11.3.3. Tropical cyclone

Hazard	Controlling authority	Hazard management authority	
Tropical cyclone	NT Police Force	NT Emergency Service	

A tropical cyclone<sup>7</sup> hazard includes a cyclone threat to the township, housing and infrastructure of the Locality including the surrounding areas. During the cyclone season, November to April, the Bureau keeps a 24-hour watch on developing tropical weather systems. The Bureau will issue a tropical cyclone advice whenever a tropical cyclone is likely to cause winds in excess of 62 km/h (gale force) over Australian communities within the next 48 hours.

The northern region coast is affected by an average of 2 – 3 tropical cyclones annually, cyclones can seriously affect the social, built, natural and economic environments of communities impacted.

**Table - cyclone categories** 

Category	Max mean wind (km/h)	Typical strongest gust (km/h)	Transport effects
1	63 - 88	< 125	Negligible house damage. Damage to some crops, trees and caravans. Craft may drag moorings
2	89 - 117	125 - 164	Minor house damage. Significant damage to signs, trees and caravans. Heavy damage to some crops. Risk of power failure. Small craft may break moorings.
3	118 - 159	165 - 224	Some roof and structural damage. Some caravans destroyed. Power failures likely.
4	160 - 199	225 - 279	Significant roofing loss and structural damage. Many caravans destroyed and blown away. Dangerous airborne debris. Widespread power failures.
5	>200	> 279	Extremely dangerous with widespread destruction.

Note: Corresponding approximate wind gusts and central pressure are also provided as a guide. Stronger gusts may be observed over hilltops, in gullies and around structures.

As the Hazard Management Authority the NTES have established, equipped and trained volunteer units, to support response and recovery operations to tropical cyclones.

The NTES maintain the Territory EOC in a state of readiness. If the EOC is required to be activated by the Local Controller, the NTES will support this activation and facilitate, where possible, the staffing requests for IMT personnel.

#### Prevention and preparative controls include, but are not limited to:

- implementation of cyclone preparation initiatives and council clean ups
- radio, television and social media posts

#### Public safety message process (initial notification):

the Bureau issue a cyclone advice to NTES TDO

<sup>&</sup>lt;sup>7</sup> More information can be found at: <a href="http://www.bom.gov.au/cyclone/tropical-cyclone-knowledge-centre/understanding/tc-info/">http://www.bom.gov.au/cyclone/tropical-cyclone-knowledge-centre/understanding/tc-info/</a>

- NTES TDO notifies Local Controller and NTES Northern Command Manager
- Local Controller Notifies LEC
- NTES Northern Command Manager consults with the Bureau, Regional Controller, NTES Director and Incident Controller to determine recommended messaging
- NTPFES Media and Corporate Communications Unit or Public Information Group receives approved messaging to publish
- responsibility for development and promulgation of warnings and information post the establishment of an IMT will rest with the Public Information Officer and the Incident Controller

The response to a cyclone event is staged and dependant on timings of the Watch and Warnings issued by the Bureau and the projected impact on the communities. The following table provides a guide to typical actions for members of the LEC upon receipt of notifications from the Bureau. The table also notes the need for LEC members to contribute to the recovery process post the impact of the cyclone.

# Actions to be taken – tropical cyclone – guide only

Organisation/	Watch	Warniı	ng (onset of Gale Force V	Vinds)	Reduced risk	Transition to
Provider	48 hours	24 + hours	6 + hours	3 + hours		recovery
All members	Attend briefings Inform key stakeholders Provide SITREPs Assist the Local Controller as required Ensure final preparations are undertaken prior to stage 2	Attend briefings Inform key personnel Assist the Local Controller as required	Attend briefings Assist the Local Controller as required Inform key personnel	Assist the Local Controller as required Take and remain in shelter	Remain in shelter until directed by Local Controller Assist the Local Controller as required	Attend briefings Inform key personnel Assist the Local Controller as required
Local Controller	Convene meeting of the LEC  Ensure LEC members and community have activated their Cyclone Plan  Co-ordinate the dissemination of the cyclone watch information to the relevant local community  Communications established and maintained with Regional Controller, and NTES TDO and advise state of preparedness  Participate in REC meetings as required	Convene meeting of the LEC Ensure that the dissemination of the cyclone warning information to the public is maintained Advise Regional Controller of state of preparedness and ascertain SITREP's requirement Activate EOC if required	Update LEC and allocate tasks as required Ensure that the dissemination of the cyclone warning information to the public is maintained At the appropriate time, advise persons at risk to move to a shelter	Take and remain in shelter	When it is declared safe to move outside, ascertain the extent of injury to persons and damage to property Give directions to survey teams advising community of reduced risk Provide SITREP's to Regional Controller and Incident Controller Prepare for transition to recovery	Provide SITREP's to Regional Controller and Incident Controller Prepare for transition to recovery Begin compilation of information for Post Operations Report

## 11.4. Annex D: Evacuation guideline

The following is to be used as a guide only.

Stage 1 - Decision			
Authority	The Regional Controller will authorise the activation of the evacuation plan.  This evacuation plan is to be approved by the TEMC prior to activation.	Regional Controller in conjunction with TEMC	
Legal references	The Act and approved Local Emergency Plan. It is recommended that the Minister declares an Emergency Situation under section 18 of the Act, when this evacuation plan is activated.		
Alternative to evacuation? I.e. shelter in place, temporary accommodation on-site/nearby.	If needed residents will be progressively relocated within the community to <location be="" determined="" to="">.</location>	Local Controller to arrange	
Summary of proposed evacuation	<ul> <li>Decision - made by the Regional Controller when the community have sustained damage during <to be="" determined=""> that cannot support residents in situ during recovery.</to></li> <li>The Local Controller to disseminate information to the community.</li> <li>Withdrawal - three stage process:         <ol> <li><location be="" determined="" to=""> ; community to the <location be="" determined="" to=""> ; to be registered for evacuation to <location be="" determined="" to=""></location></location></location></li> <li>once registered, groups to move to the airstrip assembly area using buses/vehicles</li> <li>Red Cross to register check utilising Register Find Reunite.</li> </ol> </li> <li>Shelter - evacuees will be encouraged to stay with friends or family. The remainder will be accommodated at an evacuation centre <location be="" determined="" to=""></location></li> <li>Return - to be determined once recovery can sustain return to <location be="" determined="" to="">.</location></li> </ul>	The decision will be informed by additional advice from technical experts e.g. the Bureau	
Which communities/outstations or geographical area does the evacuation apply to?	<out and="" homelands="" homesteads="" stations,=""></out>		
Vulnerable groups within the community	The Medical Group will liaise with local health staff and provide information on medically vulnerable people.	Medical Group & Transport Group to action.	

	The identified people will be evacuated <at a="" be="" determined="" time="" to="">.</at>	
Community demographics (approx. total number, family groups, cultural groups etc.)	For more information, refer to the Evacuation Centre Field Guide (page 20 section 4.3) which can be found in WebEOC.  Examine the demographic breakdown of the community to be evacuated including:  • the total number of people being evacuated  • an estimate of the number of people likely to require accommodation in the evacuation centre  • a breakdown of the evacuees to be accommodated by age and gender. For example, the number of family groups and single persons, adult males and females, teenage males and females, and the number of primary school-aged children, toddlers and infants  • a summary of cultural considerations, family groups, skin groups and community groups  • potential issues that may arise as a result of these groups being accommodated in close proximity to one another  • a summary of people with health issues, including chronic diseases, illnesses and injuries.  • details of vulnerable clients (other than medically vulnerable), such as the elderly, frail and disabled (and if they are accompanied by support i.e. family members)  • details of community workers also being evacuated who may be in a position to support the operation of the evacuation centre. Examples include teachers, nurses, health workers, shire staff, housing staff	
What is the nature of the hazard?	and police. <to be="" determined=""></to>	
Estimated duration of the potential evacuation?	<to be="" determined=""></to>	

Triggers for the evacuation	Example	Regional Controller
	<ol> <li>evacuation planning to commence when the Locality is under a <to be="" determined=""></to></li> </ol>	
	<ol><li>implement evacuation if the severity and impact has caused major damage and disruption to all services</li></ol>	
	<ol> <li>elderly and vulnerable people are to be considered for evacuation due to limited health services.</li> </ol>	
	Further details of the intra-community relocation plan are required.	
Self-evacuation	Where possible residents will be encouraged to self-evacuate and make their own accommodation arrangements if they wish to do so. Individuals and families taking this option will be encouraged to register prior to leaving the community.	Local Controller
Responsibility for the	Regional Controller	
coordination Stage 1	Local Controller	
	Stage 2 – Warning	
Who has the authority to issue warnings?	The Bureau will issue advice and warnings. All further public information will be approved by the Regional Controller in consultation with the Public Information Group and NTES.	Regional Controller to liaise with Public Information Group and NTES
	The Local Controller will coordinate the dissemination of community level information.	
	A combination of the following will be utilised:	
	<ul> <li>broadcasted over radio and television</li> </ul>	
	<ul> <li>social media utilising the NTPFS Facebook page SecureNT twitter feed.</li> </ul>	
	loud hailer	
	door to door	
	Emergency Alert System.	
Process for issuing evacuation warnings and other information	At community level, the Local Controller is to appoint a community spokesperson to disseminate up to date situational information at community meetings which are to be held immediately post a convening LEC meeting, at each declared stage of the Local Emergency Plan. A media brief approved by the Local Controller at each LEC meeting, will be announced over the local radio station containing current situational information, relevant safety information, what to prepare, when to self-evacuate, and where to go.	Local Controller

When will warnings be	Immediately upon a decision to evacuate being	Local Controller
issued (relative to the	made the LEC will commence coordinating	
impact of the hazard)?	residents to prepare for transport.	
What information will the	To be determined:	Local Controller
messages contain?	<ul> <li>outline of the proposed evacuation plan</li> </ul>	Biosecurity &
(What do people need to know?)	<ul> <li>measure to prepare residences</li> </ul>	Animal Welfare
	safety issues; not overloading transport	Group liaison
	<ul> <li>items to bring on the evacuation</li> </ul>	
	<ul> <li>arrangements for pets and animals.</li> </ul>	
Responsibility for the	Local Controller/Regional Controller	
coordination of Stage 2	Local Controller/ Regional Controller	
	Stage 3 - Withdrawal	
Outline	Three stage process:	
	1. community residents to <staging 1="" area=""></staging>	
	2. <staging 1="" area=""> to airport</staging>	
	<ol><li>airport to <location be="" determined="" to=""> evacuation centre</location></li></ol>

Transport of vulnerable members of the community	Medical Group to arrange transport of vulnerable people from the community to <location be="" determined="" to="">.</location>	Medical Group
Registration and tracking	<ul> <li>Welfare Group to activate registration arrangements. Registration will be undertaken by NTPF and will occur at <location be="" determined="" to="">.</location></li> </ul>	Welfare Group/ NTPF
	<ul> <li>Names of evacuees will be obtained prior to boarding buses.</li> </ul>	
	<ul> <li>Where possible details of individuals and families self-evacuating to be obtained on arrival at the <location be="" determined="" to=""> airstrip.</location></li> </ul>	
	<ul> <li>If persons are not registered as evacuees or self-evacuees they will not be provided access to the evacuation shelter.</li> </ul>	

Coordination Stage 3	Regional Controller	EOC coordination.
	Stage 4 – Shelter	
Overview	An evacuation centre will be established at the	
	<pre><location be="" determined="" to="">. The <location be="" determined="" to=""> will be the primary areas used.</location></location></pre>	
Alternate shelter options	Where possible evacuees will be encouraged to seek alternative accommodation with family, friends or through commercial accommodation.	
Estimated duration of the shelter phase	To be determined	
Arrangements for domestic animals	No domestic animals are to accompany evacuees. Any self-evacuees with domestic animals will be expected to make their own arrangements for the animals.	Advise Animal Welfare
Roles		
• Director	TFHC	Welfare Group
Deputy Director	TFHC	Welfare Group
Logistics/planning	EOC	Controlling Authority
Admin teams	EOC	DCMC/Welfare Group
Shift manager/s	To be determined – drawn from pool of trained staff.	Welfare Group
Welfare team	To be determined	Welfare Group
Facility team	To be determined	
Sport and Rec team	To be determined	
Medical team	To be determined. It is likely St Johns volunteers will be requested. Evacuees will be referred to off-site medical services.	Medical Group
Public health team	To be determined	Public Health Group
Transport team	To be determined	Transport Group

Evacuation centre set-up	Refer to the evacuation centre template for set- up considerations.	
What strategy will be put in place to close the evacuation centre?	Closure of the evacuation centre will be largely dependent on the extent of inundation and complexity of the recovery process.	
	Stage 5 – Return	
Indicators or triggers that will enable a return	(Refer to Recovery action plan for the community) DCMC	
Who is responsible for developing a plan for the return?	Recovery coordination in conjunction with Incident Management Team (IMT).	
Transportation	To be determined	
Route/assembly points en-route	To be determined	
End point	To be determined	
How will information about the return be communicated to evacuees?	To be determined	
What information needs to be conveyed to the evacuated community members?	To be determined	

## 11.5. Annex E: Summary of response and recovery activities

Response

The following table outlines a summary of possible response and recovery activities to be considered following an event.

This table is presented as a guide only, assisting emergency managers with operational decision making, planning and resource allocation. It also highlights the importance of response and recovery coordination working collaboratively.

Activities have been broken down and are listed under either response or recovery for simplicity and ease of use. In practice not all response activities will be completed during the response phase. Likewise not all recovery activities will commence after the transition to recovery.

The post event period of any event is highly dynamic and produces many challenges, both foreseen and unpredicted. Response and recovery coordination must be flexible and able to adapt to the situation as it evolves.

In most cases the points noted in this table and in the ensuing document are outlined in greater detail in functional group or agency plans.

Recovery

	Controlling Authority DCMC / TCCC			
Act	tivity	Response activities	Recovery activities	
1.	Situational awareness	<ul> <li>Road clearance teams</li> <li>General public</li> <li>Media reports</li> <li>Survey and rescue teams</li> <li>Impact assessment teams</li> </ul>	<ul> <li>Contributes to recovery planning through impact assessment data</li> <li>Comprehensive impact assessments</li> <li>Needs assessment</li> </ul>	
2.	Public Information	<ul> <li>Public Information Group activation</li> <li>Spokes persons identified</li> <li>SecureNT activated</li> </ul>	Continues in recovery	
3.	Survey and Rescue	<ul> <li>Survey teams deploy to designated areas</li> <li>Critical sites surveyed</li> <li>Deploy rescue teams - NTFRS and Territory Response Group provide primary Urban Search and Rescue capability</li> </ul>	Survey and impact assessment data used to develop the Recovery Action Plan	
4.	Road clearance	<ul> <li>Road patrol teams deploy and check assigned routes</li> <li>Road clearance to priority sites</li> <li>Assess Stuart Hwy to Katherine (supply route)</li> </ul>	<ul> <li>Restoration of road networks and bridges</li> <li>Return to business as usual</li> </ul>	
5.	Emergency accommodation	Emergency accommodation and shelter	Evacuation centres may continue into recovery	

Activity	Response activities	Recovery activities
6. Medical	<ul> <li>evacuation centres</li> <li>Provision of resources that will enable people to remain in their homes</li> <li>Emergency clothing</li> <li>Hospital</li> </ul>	<ul> <li>Temporary accommodation options</li> <li>Repatriation planning</li> <li>Hospital</li> </ul>
	- road clearance to the hospital  - damage assessment  - increase morgue capacity  - divert patients from remote and regional areas  - power (fuel) and water supplies  • Medical clinics and field hospitals  - determine the need for clinics to be opened  - assess damage to clinics  - deploy field hospital/s  • Medical presence in shelter  - supplied by the Medical Group  • Ambulance pick up points on key, cleared roads  • GP clinics and pharmacies  - identify GP clinics able to open  - identify pharmacies able to open  - wulnerable people  - support agencies to follow-up and advise the Medical Group  - vulnerable people in shelters  - support for vulnerable people at shelters  - support for vulnerable people at shelters  - CareFlight / Royal Flying Doctor Service	<ul> <li>repair works</li> <li>business continuity plans</li> <li>DoH         <ul> <li>health centres</li> <li>repair works</li> <li>reopen other clinics</li> </ul> </li> <li>Support return of vulnerable people in community</li> <li>GP clinics and pharmacies         <ul> <li>ongoing liaison by the Medical Group</li> </ul> </li> <li>CareFlight / Royal Flying Doctor Service - resume business as usual</li> <li>St John Ambulance - resume business as usual</li> </ul>

Act	ivity	Response activities	Recovery activities
7.	Essential goods and services	<ul> <li>Establish emergency feeding and food distribution points</li> <li>Assessing the damage to suppliers and retailers of critical resources</li> <li>Assess the impact on barge operations and any effect on the ability to supply remote communities</li> <li>Implement interim banking arrangements</li> </ul>	<ul> <li>Support the re-opening of the private business sector</li> <li>Monitor levels and availability of essential goods</li> <li>Manage logistics arrangements supplying resources to outlying communities</li> <li>Public Health inspections (food outlets)</li> <li>Banking sector business continuity arrangements</li> </ul>
		<ul> <li>Fuel</li> <li>Fuel suppliers and point of sale</li> <li>Manage fuel supplies to emergency power generation</li> </ul>	<ul> <li>Monitor fuel levels</li> <li>Infrastructure repairs</li> <li>Emergency fuel supplies for recovery</li> <li>Liaise with fuel suppliers, distributors and wholesalers to re-establish long term supply</li> </ul>
		<ul> <li>Banking         <ul> <li>Assess damage to banks and ATMs</li> </ul> </li> <li>Implement temporary arrangements</li> </ul>	<ul> <li>Emergency cash outlets</li> <li>Implement long term arrangements</li> </ul>
8.	Evacuation	<ul><li>Evacuations within community</li><li>Evacuation out of community</li><li>Registration</li></ul>	<ul> <li>Support services for evacuees</li> <li>Recovery information for evacuees</li> <li>Repatriation</li> </ul>
9.	Public Health	<ul> <li>Communicable disease control response</li> <li>Drinking water safety standards</li> <li>Sewage and waste disposal</li> <li>Safe food distribution and advice</li> <li>Vector and vermin control</li> <li>Food and commercial premises</li> </ul>	Ongoing in recovery
10.	Utilities	<ul> <li>Power supply</li> <li>Power generation</li> <li>Water supply</li> <li>Sewerage</li> <li>Emergency sanitation</li> </ul>	<ul> <li>Restore power network</li> <li>Restore water and sewerage infrastructure</li> <li>Issue alerts until safe to use</li> </ul>

Activity	Response activities	Recovery activities
11. Impact Assessments	<ul><li>Training assessment teams</li><li>Initial impact assessments</li></ul>	<ul> <li>Comprehensive Impact         Assessments     </li> <li>Ongoing needs assessments</li> </ul>
12. Transport infrastructure (supply lines)	<ul> <li>Air (Airport/Airstrip)         <ul> <li>Clear the runway to allow air movements</li> </ul> </li> <li>Establish a logistics hub at the airport</li> <li>Terminal damage and operational capability assessment</li> </ul>	Monitor repairs and business continuity activities
	<ul> <li>Road</li> <li>Highway and critical access roads damage assessment</li> <li>Repair work to commence immediately</li> </ul>	<ul> <li>Planning and prioritising repair work of all affected key Territory Highways (Stuart, Barkly, Victoria and Arnhem)</li> </ul>
	Rail  Rail damage assessment  Outage estimation	Ongoing liaison with operator to support restoration to business as usual
	<ul> <li>Port, Harbour and Barge</li> <li>Assess damage to port infrastructure and harbour facilities</li> <li>Assess the damage to barge facilities</li> </ul>	Repairing infrastructure  Establish alternate arrangements for the supply of remote communities
13. Waste management	<ul> <li>Waste management requirements and develop waste management plan if required</li> </ul>	Continues in recovery
14. Repairs and reconstruction	<ul> <li>Private housing         <ul> <li>impact assessments</li> <li>temporary repairs</li> </ul> </li> <li>Government buildings         <ul> <li>damage assessment</li> </ul> </li> <li>Public housing         <ul> <li>impact assessments</li> </ul> </li> <li>Private industry         <ul> <li>damage assessments</li> </ul> </li> </ul>	<ul> <li>Private housing         <ul> <li>information and support to facilitate repairs</li> </ul> </li> <li>Government buildings         <ul> <li>repairs and reconstruction</li> </ul> </li> <li>Public housing         <ul> <li>long term repair plans</li> </ul> </li> <li>Private industry         <ul> <li>repair and reconstruction</li> </ul> </li> <li>Temporary accommodation for a visiting construction workforce</li> </ul>

Activity	Response activities	Recovery activities
15. Transport Services	<ul> <li>Staged re-establishment of public transport services</li> </ul>	Continues in recovery
16. Tele- communications	<ul> <li>Telstra and Optus will assess the damage to their infrastructure</li> <li>Put in place temporary measures to enable landline and mobile services</li> </ul>	<ul> <li>Repair damage networks and infrastructure (for private entities there is support for operators only)</li> </ul>
17. Public safety	<ul> <li>Police will maintain normal policing services to the community</li> </ul>	<ul> <li>Gradual return to business as usual</li> </ul>
18. Animal welfare	<ul> <li>Temporary emergency arrangements for pets</li> </ul>	<ul> <li>Reunite pets with their owners and cease emergency support arrangements</li> </ul>
19. Community consultation	<ul> <li>Information provision regarding the overall situation, response efforts, what services are available and how to access them</li> </ul>	<ul> <li>Community consultation process regarding long term recovery and community development</li> </ul>

## 12. Acronyms

Acronyms	Definitions
AAPA	Aboriginal Areas Protection Authority
ABC	Australian Broadcasting Corporation
AIIMS	Australasian Inter-Service Incident Management System
BART	Batchelor, Adelaide River, Tortilla Volunteer Bushfire Brigade
BFNT	Bushfires NT
CCGC	Coomalie Community Government Council
DCDD	Department of Corporate and Digital Development
DCMC	Department of the Chief Minister and Cabinet
DEPWS	Department of Environment, Parks and Water Security
DIPL	Department of Infrastructure, Planning and Logistics
DITT	Department of Industry, Tourism and Trade
DoE	Department of Education
DoH	Department of Health
ERA	Emergency Response Area
EOC	Emergency Operations Centre
ESO	Essential Services Officer
FERG	Fire and Emergency Response Group
JESCC	Joint Emergency Service Communication Centre
ICAD	Intergraph Computer-Aided Dispatch
ICC	Incident Control Centre
ICP	Incident Control Point
IMT	Incident Management Team
КМ	Kilometres
LCC	Local Coordination Centre

Acronyms	Definitions
