FIREBREAKS

This is an example of how firebreaks must be installed along the boundary of your land.

Required 4m firebreak

Recommended 8m firebreak

What is a firebreak?

Firebreak must be:

- At least 4 metres wide.
- In place along the entire boundary of the land.
- Clear of vegetation, or have grass no taller than 50 mm, or consist of lawn or cultivated garden.

The NTFRS also recommends that an 8 metre firebreak is maintained around your house, and any other permanent structures, stationary engines and flammable materials.

FIREBREAKS

THINGS TO CONSIDER

- Creating and maintaining firebreaks helps to protect your property against fire.
- Firebreaks also provide access for firefighters and firefighting vehicles to safely enter your property to respond to a fire or other emergency.
- It is your responsibility to create and maintain firebreaks on your property. Firebreaks must be maintained all year round.
- This is a requirement under law.
- The NTFRS conducts inspections to help residents understand firebreak requirements and ensure their firebreaks are compliant.
