# 1. Document control

## 1.1. Governance

Document title	Gunbalanya Local Emergency Plan
Contact Details	NT Emergency Service, Planning and Preparedness Command
Approved by	Territory Controller
Date Approved	12 December 2014
Document Review	Annually
TRM Number	04:D23:66116

## 1.2. Version history

Date	Version	Author	Summary of changes
16/11/2014	1	John McRoberts	First version
27/10/2015	2	Reece Kershaw	Reviewed and updated
30/12/2016	3	Kate Vanderlaan	Reviewed and updated
16/03/2018	4	Grant Nicholls	Reviewed and updated
28/11/2018	5	Travis Wurst	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
20/01/2020	6	Michael Hebb	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
17/11/2020	7	Travis Wurst	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
02/11/2021	8	Martin Dole	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate
13/06/2023	9	Travis Wurst	Reviewed and endorsed by the Regional Controller, as the Territory Controller's delegate

Disclaimer: Every effort has been made to ensure that the information contained within this plan is accurate and where possible reflects current best practice. However, the Northern Territory Emergency Service does not give any warranty or accept any liability in relation to the content of material contained in the document.

## 2. Acknowledgement of Country

The Northern Territory Police, Fire and Emergency Services acknowledges the First Nations people throughout the Northern Territory, from the red sands of Central Australia to the coastal people in the Top End.

We recognise their continuing connection to their lands, waters and culture. We also pay our respects to the Aboriginal and Torres Strait Islander people with whom we work and who we serve and protect.

We pay our respects to the Aboriginal and Torres Strait Islander cultures, and to their leaders past, present and emerging.

## 3. Introduction

### 3.1. Purpose

The purpose of this plan is to describe the emergency management arrangements for Gunbalanya Locality (the Locality).

### 3.2. Application

This Plan applies to the Gunbalanya Locality.

### 3.3. Key considerations

The *Emergency Management Act 2013* (the Act) is the legislative basis for emergency management across the Northern Territory (NT). The Act reflects an all hazards approach to emergency and disaster events, natural or otherwise. It provides for the adoption of measures necessary for the protection of life and property from the effects of such events.

The Act defines the emergency management structures, roles and responsibilities for the NT and, in conjunction with the Territory and regional emergency plan(s), form the basis for this Plan.

This Plan:

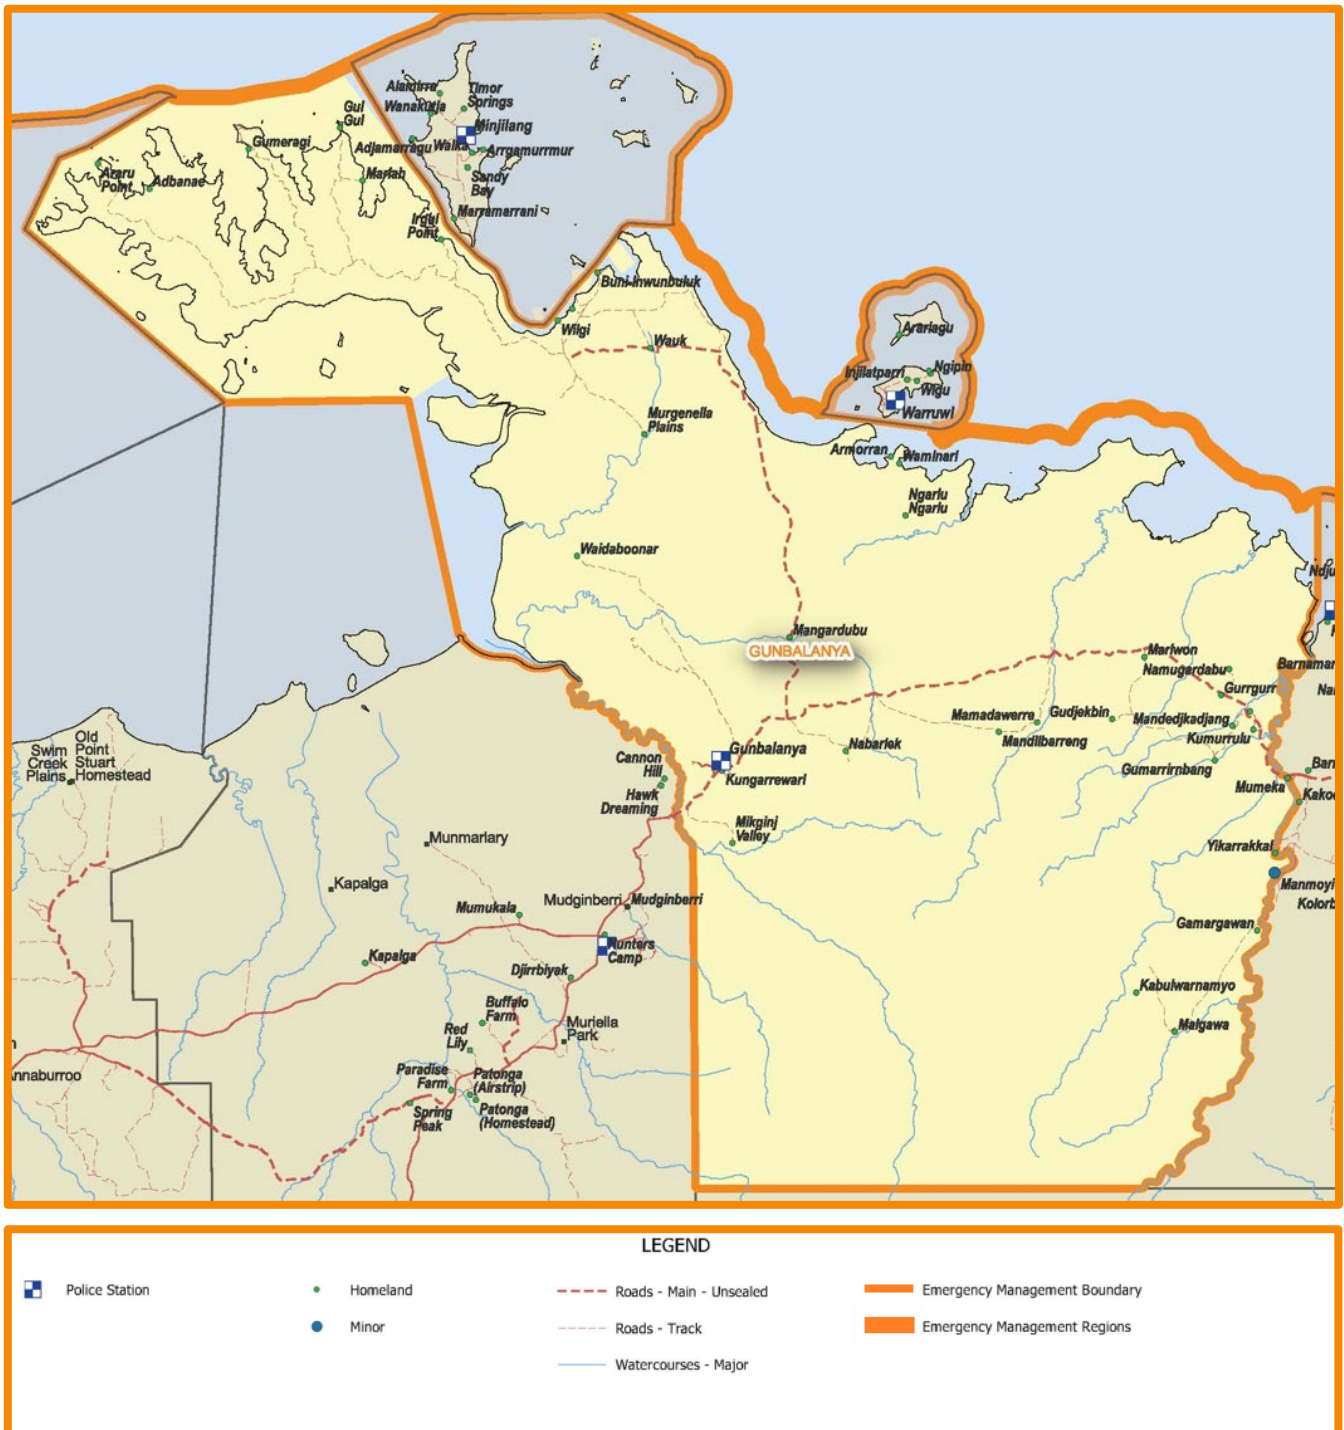

- confirms appointment of a Local Emergency
- confirms establishment of the Local Emergency Committee (LEC)
- assesses hazards most likely to affect the community
- specifies control and coordination arrangements for mobilisation of local and, if necessary regional, resources
- identifies roles and responsibilities of key stakeholders
- details specific emergency response procedures for the higher risk situations.

## 4. Locality context

This Plan complements the Northern Regional Emergency Plan<sup>1</sup> as it relates to the Locality. For further information on the hierarchy of plans, refer to the Territory Emergency Plan. The Locality covers approximately 15,000 square kilometres (km) and is located approximately 290 km east of Darwin and forms part of the Northern Region, as defined by the Territory Emergency Plan<sup>2</sup>.

The population of the Locality is approximately 1,200 with the main population being in the community of Gunbalanya. Gunbalanya is also known as Oenpelli.

The Locality area extends north to the Cobourg Peninsula. It is 60 km north east of Jabiru across the East Alligator River in Arnhem Land. The main road link out of Gunbalanya (Oenpelli Road) to the Arnhem Highway is often closed during the Wet Season, when the East Alligator River becomes impassable.

<sup>1</sup> More information can be found at: <https://www.pfes.nt.gov.au/emergency-service/publications>

<sup>2</sup> More information can be found at: <https://www.pfes.nt.gov.au/emergency-service/emergency-management>

## 4.1. Climate and weather

The Locality is situated in the Top End and experiences weather conditions typical to those of the region. There is a distinct Wet Season (November to April) and Dry Season (May to October).

## 4.2. Geography

The general topography of the Locality ranges from sea level to a highest point of approximately 300 metres (m), which is attained fairly consistently throughout the escarpment in the southern region.

The Locality is drained by a number of rivers and creeks, the main being as follows:

- East Alligator River (south west boundary) – vehicular access through Cahill’s Crossing can be affected by tidal changes and increased flows in the Wet Season
- King River
- Goomadeer River (eastern boundary) – affects the Maningrida Road during Wet Season
- Cooper Creek – affects the Maningrida and Cobourg Roads during the Wet Season
- Jungle Creek.

## 4.3. Sacred sites

Injalak Hill, 5 km east of Gunbalanya, is a superb sandstone monolith, rich in rock art. The Alligator Rivers coastal floodplains include 4 large adjacent floodplains that form the southern coastline of Van Dieman Gulf, about 190 km east of Darwin<sup>3</sup>.

The Aboriginal Areas Protection Authority (AAPA) is a statutory body established under the *Northern Territory Aboriginal Sacred Sites Act 1989* and is responsible for overseeing the protection of Aboriginal sacred sites on land and sea across the NT.

A sacred site is defined by the *Aboriginal Land Rights (Northern Territory) Act 1978* (Cth) as being ‘a site that is sacred to Aboriginals or is otherwise of significance according to Aboriginal tradition’. Sacred sites are typically landscape features or water places that are enlivened by the traditional narratives of Aboriginal people.

AAPA requests notification of any action that may have affected a sacred site.

For more information on sacred sites relevant to this Locality, or to report an action that may have affected a sacred site, contact AAPA on (08) 8999 4365 or via email at [enquiries.aapa@nt.gov.au](mailto:enquiries.aapa@nt.gov.au).

## 4.4. Sites of conservation

Western Arnhem Plateau is a site of significance to the NT. For further information about this site and others, contact the Department of Environment, Parks and Water Security<sup>4</sup> (DEPWS).

## 4.5. Mining and industry

Mines in the Locality are:

- Cameco King River
- Narbalec Uranium Mine
- Alligator Energy Myrafall.

---

<sup>3</sup> More information can be found at: <https://nt.gov.au/environment/environment-data-maps/important-biodiversity-conservation-sites/conservation-significance-list>

<sup>4</sup> More information can be found at: <https://nt.gov.au/environment/environment-data-maps/important-biodiversity-conservation-sites/conservation-significance-list>

## 4.6. Tourism

Tourism is also a major economic contributor to the Locality, particularly throughout the months of May to October.

## 4.7. NT and local government

In March 2019, NT Government (NTG) implemented 6 regional boundaries across the NT to strengthen the role of the Regional Network Group and align service delivery and reporting. This Locality sits within the Top End Boundary.

NTG agencies that have a presence in the Locality include:

- NT Police, Fire and Emergency Services (NTPFES)
  - NT Police Force (NTPF) (police station)
- Department of Health (DoH)
  - Gunbalanya Primary Health Care Centre
- Department of Education (DoE)
  - Gunbalanya Community School.

Local government in the Locality is provided by the West Arnhem Regional Council (WARC). The council headquarters are in Jabiru.

## 4.8. Building codes

Buildings and construction in the Locality are subject to the *Building Act 1993* and the *Building Regulations 1993*.

## 4.9. Land use

The Locality land use is in consultation between WARC and Traditional Owners and include infrastructure in the areas of:

- residential
- sewerage ponds
- air strip
- waste management.

## 4.10. Power generation and distribution

Power to the Locality is provided by stand-alone, diesel power stations. This is contracted out from the Power and Water Corporation (PAWC). A solar farm supplements power generation.

## 4.11. Water services

Chlorinated and fluoridated water is supplied to the town via 15 bores, which are situated approximately 3.5 km from the town boundary.

## 4.12. Health infrastructure

The Gunbalanya Health Centre has the capacity to provide to emergency medical aid in addition to routine health treatment.

Serious medical cases are required to be medically evacuated to Darwin.

### 4.13. Emergency service infrastructure

The Locality has the following emergency service infrastructure:

- police station and cells.

### 4.14. Roads

The Locality has 3 major roads:

- Oenpelli Maningrida Road - The road that links Maningrida with Jabiru
- Murgendela Road - The road to Murgendela and then to Cobourg Peninsula
- Unnamed Road - An access road to Nabarlek.

During the Wet Season many of the roads are impassable.

### 4.15. Airports

The table below lists the airstrips in the Locality:

Name of the strip	Datum	Details (type, length, etc.)	Operator of the strip
Gunbalanya – (Oenpelli)	12°19'36"S 133° 00'16"E	Bitumen 1320 m x 30 m Avgas, Solar lighting	WARC
Murgendela	11° 33'S 132°56'E	Gravel 1800 m x 30 m	Roads and Maintenance
Cape Don	11° 17'S 131°49'E	Gravel 1180 m x 20 m	

### 4.16. Telecommunication

Telecommunications are available across the Gunbalanya town area via a combination of landline, mobile and satellite communications delivery.

Free Emergency Satellite Internet is now available at Gunbalanya Recreation Centre. Only available while power is available.

### 4.17. Local radio stations

Gunbalanya have the following broadcasts:

- 1 Broadcasting for Remote Aboriginal Communities Scheme (BRACS) Radio
- 105.7 FM ABC (Australian Broadcasting Corporation) Radio
- 106.1 FM Top End Aboriginal Bush Broadcasting Association (TEABBA) Radio Station– Gunbalanya and Communities in Arnhem Land.

### 4.18. Medically vulnerable clients

A list of all medically vulnerable clients is held with the manager of the Gunbalanya Primary Health Care Centre.

Aged care in the Locality is provided by WARC and provides a meals on wheels service.

## 5. Prevention

### 5.1. Emergency risk assessments

The Gunbalanya LEC are responsible for undertaking appropriate activities to prevent and mitigate the impact of emergencies in their Locality.

### 5.2. Disaster hazard analysis and risk register

The LEC has identified the following hazards for the Locality:

- air crash
- fire (within Fire Protection Zones)
- flood
- road crash
- severe storm
- tropical cyclone.

These hazards have been rated against the National Disaster Risk Assessment Guidelines (NERAG):

Hazard	Overall consequence	Overall likelihood	Risk rating
Air crash	Minor	Rare	Low
Fire (within Fire Protection Zones)	Minor	Unlikely	Low
Flood	Minor	Unlikely	Low
Road crash	Minor	Likely	Medium
Storm and water damage	Minor	Likely	Medium
Tropical cyclone	Moderate	Very rare	Low

### 5.3. Hazard specific prevention and mitigation strategies

Prevention and mitigation relates to measures to reduce exposure to hazards, and reduce or eliminate risk. Actions include identifying hazards, assessing threats to life and property, and from these activities, taking measures to reduce potential loss of life and property damage.

The cornerstone of mitigation is guided and coordinated risk assessments, which should involve all potentially affected members of a community. Strategies are developed based on a thorough understanding of hazards identified in emergency risk planning and their interaction with all aspects of society.

Specific prevention and mitigation strategies for identified hazards can be found at **Annex C**.

## 6. Preparedness

Arrangements to ensure that, should an emergency occur, all resources and services that are needed to provide an emergency response and or recovery can be efficiently mobilised and deployed.

### 6.1. Planning

NT emergency plans<sup>5</sup> are required by the Act and are maintained at a Territory, regional and local level. Arrangements in plans aim to be flexible and scalable for all hazards. The planning process enables agreements to be reached between people and organisations in meeting communities' needs during emergencies. The plan becomes a record of the agreements made by contributing organisations to accept roles and responsibilities, provide resources and work cooperatively.

The LEC is responsible for the annual review of operations and the effectiveness of the Local Emergency Plan, supported by the NT Emergency Service (NTES) Planning and Preparedness Command.

### 6.2. Emergency resources and contacts

The LEC are responsible for maintaining the emergency resource register and LEC contact list. Local emergency management stakeholders are to advise the Local Controller of changes to resource holdings, operational response capabilities and key personnel contacts. Emergency resource and LEC contact list for each locality are available on WebEOC.

### 6.3. Training and education

The Act provides the legislative requirement for those involved in emergency management activities to be appropriately trained. Training and education activities are undertaken to ensure agencies are familiar with and understand the NT emergency management arrangements, as well as the relevant controlling and hazard management authorities for identified hazards.

The NTES Learning and Development Command is responsible for emergency management training across the NT. Online and face to face training is scheduled throughout the year.

### 6.4. Community education and awareness

Effective and ongoing community education and preparedness programs that emphasise to communities the importance of practical and tested emergency plans and safety strategies is essential. Empowering communities to act in a timely and safe manner will minimise the loss of life, personal injury and damage to property and contribute to the effectiveness of any warning system.

List of available activities and initiatives in the area:

- NTES hazard briefings
- NTES Paddy Program
- NT Fire and Rescue Service (NTFRS) Smart Sparx Program
- Red Cross Pillowcase Program
- St Johns Ambulance First Aid in Schools Program.

### 6.5. Exercises

Local level exercises are a key measure for testing the effectiveness of the Local Emergency Plan and should involve all relevant stakeholders. Exercises ensure that the Plan is robust and understood, and that capabilities and resources are adequate. Exercises are conducted if the Plan has not been enacted since the last review, or substantial changes have occurred, including:

---

<sup>5</sup> More information can be found at: <https://pfes.nt.gov.au/emergency-service/publications>

- legislative changes
- major changes have occurred in the areas of key personnel, positions or functions across prevention, preparedness, response and recovery
- new or emerging hazards/risks have been identified.

The NTES Planning and Preparedness Command have developed resources that outlines the process to develop the exercise concept in designing, planning, conducting, facilitating, participating or evaluating exercises.

## 7. Response

Actions taken in anticipation of, during and immediately after an emergency to ensure that its effects are minimised and that people affected are given immediate relief and support.

### 7.1. Control and coordination

Arrangements for response are based on pre-agreed roles and responsibilities for stakeholders. When the scale and complexity of an event is such that resources of the community are depleted a number of arrangements are in place for assistance from the region, the Territory and/or the Australian Government. Pathway for assistance is through the Regional Controller.

### 7.2. Local Emergency Controller

In accordance with section 76 of the Act, the Territory Controller or their delegate (section 112 of the Act) has appointed a Local Emergency Controller (Local Controller). The Local Controller is the OIC of Gunbalanya Police Station. The Local Controller is subject to the directions of the Regional Controller. The powers, functions and directions of the Local Controller can be found in sections 77, 78 and 79 of the Act.

### 7.3. Local Emergency Committee

In accordance with section 80 of the Act, the Territory Controller has established a Gunbalanya LEC. The Local Controller is Chair of the LEC and remaining membership consists of representatives from NT Government and non-government entities within the Locality. Division 11 of the Act specifies the establishment, functions, powers, membership and procedure requirements of a LEC.

### 7.4. Emergency Operations Centre/Local Coordination Centre

NT Emergency Management Arrangements	Controlling Authority Arrangements
Emergency Operations Centre (EOC) (Territory and Regional level)	Incident Control Centre (ICC)
Local Coordination Centre (LCC) (Local level)	Incident Control Point (ICP)

LCCs will be established as required by Local Controllers to provide a central focus to the management, control and coordination of emergency operations in the Locality. When activated, the functions of the LCCs are:

- information collection and dissemination
- preparation and issue of official warnings and advice to the public
- coordination of the provision of resources required in the Locality
- submitting requests for resources through the Regional Controller to the Territory EOC where applicable
- dissemination of information to the media and general public.

The LCC for this Locality is the Gunbalanya Police Station. The Regional EOC will be located in Darwin at the Peter McAulay Centre. Agencies and functional groups may establish their own coordination centres to provide the focal point for the overall control and coordination of their own agency resources. Liaison officers from functional groups and support agencies will attend the EOC as required.

Incident Control Centres (ICC) will be established as required by a Controlling Authority to provide an identified facility for the management of all activities necessary for the resolution of an incident.

An Incident Control Point (ICP) is normally located near the incident in its early stages but may be relocated to an ICC where more permanent and convenient facilities and services are available.

## 7.5. WebEOC

WebEOC is a critical incident management system used throughout the NT for emergency management activities. The system is owned and maintained by NTPFES. The online platform is used for the coordination of multi-agency response to, and recovery from, an emergency event. WebEOC also enables real-time information sharing across all NTG agencies involved in emergency management activities.

## 7.6. Situation reports

It is essential for effective control and coordination of emergency management operations that the Local Controller is able to gather and collate relevant information relating to the emergency from regular, concise and accurate Situation Reports (SITREPs).

LEC members are to provide SITREPs at agreed times to enable the preparation of a consolidated report which will be distributed to all committee members and other relevant authorities. This may be achieved through WebEOC.

## 7.7. Activation of the Plan

This Plan has 5 stages of activation. These stages are designed to ensure a graduated response to hazardous events, thereby reducing the possibility of under or over reaction by the emergency management agency. The stages are:

Stage 1	Alert	This stage is declared when the Local Controller receives warning of an event which, in their opinion, may necessitate an emergency management response
Stage 2	Standby	This stage is declared when the Local Controller considers an emergency operation is imminent. During this stage passive emergency measures are commenced
Stage 3	Activation	This stage is declared when active emergency measures are required
Stage 4	Stand-down response operations and transition to Recovery	Stage 4 occurs when the Local Controller and Local Recovery Coordinator agree to transition to recovery (if required) in accordance with the transitional arrangements of this plan
Stage 5	Recovery	This stage is called if ongoing recovery operations and coordination is required

The stages identified provide for a sequential response. However, it may be necessary because of the degree of warning and speed of onset of an event, for the Local Controller to skip the actions required under stage 1 or 2.

## 7.8. Stakeholder notifications

Upon activation of the Plan the following personnel are to be advised as a matter of urgency:

- all available members of the LEC
- Northern Regional Controller
- NTES Territory Duty Officer (TDO).

## 7.9. Official warnings and general public information

Official warnings and general public information will be broadcast to the Locality through the following means:

- radio broadcast
- television news broadcast
- SecureNT website and social media broadcasts and updates.

Official warnings are issued by the Bureau of Meteorology (the Bureau), Geoscience Australia, Bushfires NT (BFNT) and the NTPFES.

Emergency Alert is a national telephony-based emergency warning system that can deliver warning messages to landlines and mobile handsets based on the service address and mobile handsets based on the last known location of the device. Authority to utilise the Emergency Alert may be given by virtue of the pre-approval of a hazard specific emergency plan or under the Territory Emergency Plan.

The approval for the release of an emergency alert message can only be authorised by one of the following:

- Territory Controller
- Director, NTES
- Regional Controller
- Chief Fire Officer
- Deputy Chief Fire Officer, NTFRS
- Executive Director, BFNT
- Chief Fire Control Officer, BFNT.

The Standard Emergency Warning Signal (SEWS) is an audio alert signal (wailing siren) which may be broadcast on public media to draw attention to the fact that an urgent safety message is about to be made. Generally, SEWS is only played before announcements concerning significant emergencies where emergency management arrangements should be activated as a result.

Control and hazard management authorities may have pre-planned use of SEWS for non-weather related events, through a pre-approved hazard-specific emergency plan.

The approval for the release of a SEWS message can only be authorised by one of the following:

- Territory Controller
- Director, NTES
- Manager Hazard Preparedness and Response NT (the Bureau) (for weather and flood-related events).

Warning and information messages for general public are authorised by the Regional or Incident Controller. The dissemination of such emergency warnings and information is to be by whatever means are appropriate and available at the time.

## 7.10. Australasian Inter-Service Incident Management System

The Australasian Inter-Service Incident Management System (AIIMS)<sup>6</sup> is a robust incident management system that enables the seamless integration of activities and resources of a single agency or multiple agencies when applied to the resolution of any event.

## 7.11. Closure of schools

The decision to close schools due to an impending threat will be made by the Chief Minister on advice from the Territory Emergency Management Council (TEMC). When the nature of an event demands an immediate response, local authorities will take the appropriate steps to ensure the safety to the public. This action may include the temporary closure of a school to begin preparations, pending formal closure of the school by the Chief Minister for the remainder of the event.

The decision to reopen schools will be made by the Chief Minister on advice from the Chief Executive, DoE.

## 7.12. Closure of government offices

The decision to close government offices due to an impending threat will be made by the Chief Minister on advice from the TEMC. When the nature of an event demands an immediate response, local authorities should take all appropriate steps to ensure public safety and the protection of property.

The decision to reopen government offices will be made by the Chief Minister on advice from the TEMC.

All NTG agencies are to have an Emergency Preparedness Plan which sets out their processes for closing down their offices once approval has been given. This should have clearly articulated employee guidelines to ensure employees know when they are authorised to leave and are required to return to work.

## 7.13. Emergency shelters and strong buildings

Emergency shelters and strong buildings are places of refuge that provide people with a place of protection and shelter during a disaster or emergency event such as a cyclone, flood or fire.

The recognised emergency shelters within the Locality are:

- West Arnhem Regional Council Office 50 capacity
- Gunbalanya Youth Centre 50 capacity
- Gunbalanya Trade Centre 50 capacity
- Sports and Social Club 20 capacity.

There are a number of buildings built to the wind terrain code in Gunbalanya and residents would be encouraged to remain in their homes.

The DoE in conjunction with NTPF and shelter owners are responsible for the management of emergency shelters during an emergency event.

The responsibilities of the emergency shelter manager are:

- the provision of personnel to staff and operate the emergency shelters at such times as they are activated
- the maintenance of effective liaison with other stakeholders with responsibilities relating to cyclone shelters, in particular the NTPF.

Emergency shelters are opened under the direction of the Territory or Regional Controller in consultation with the Shelter Group (DoE). Emergency shelters will not normally operate for more than 48 hours.

The timing of the opening of emergency shelters will be dependent upon the severity of the impending incident, the numbers to be sheltered, the time of day the incident is expected to impact and the period

---

<sup>6</sup> More information can be found at: <https://pfes.nt.gov.au/emergency-service/publications>

of time the emergency shelters are likely to be occupied. The announcement that emergency shelters are open in the Locality will be made by radio broadcast and social media, and will include emergency shelter rules such as no pets or alcohol being permitted in shelters and that food will not be provided.

### 7.14. Evacuation

Evacuation is a risk management strategy that can be used to mitigate the effect of an emergency or disaster on a community. It involves the movement of people to a safer location and their return. The decision to evacuate a community, including establishing an evacuation centre, is not taken lightly as it represents significant resource and financial implications.

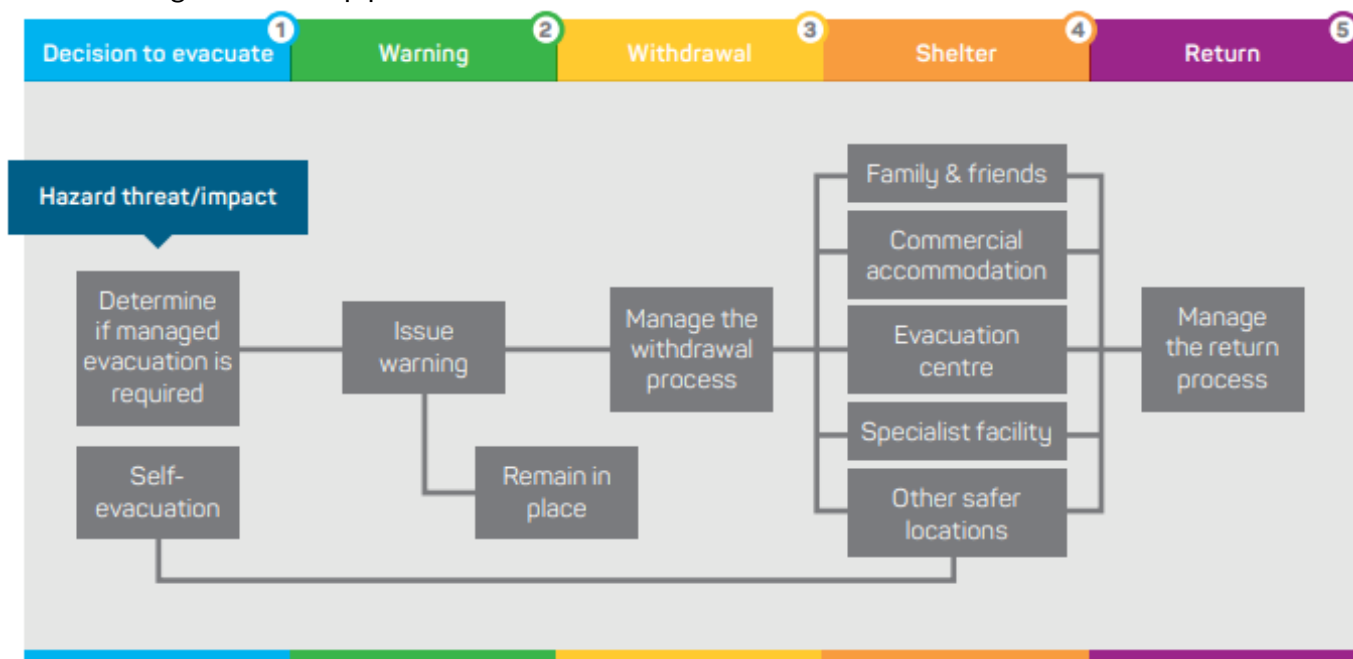

Evacuation of the Locality will be considered as a last resort. Where an evacuation is required the TEMC, in consultation with the Regional Controller, Local Controller and the LEC, will arrange emergency accommodation and transport, as necessary, through the relevant functional group/s.

An evacuation guideline for the Locality can be found at **Annex D**.

Evacuation is a complex process that has 5 distinct steps:

- decision
- warning
- withdrawal
- shelter
- return.

Each step is linked and must be carefully planned and carried out in order for the entire process to be successful. Given an evacuation centre will only be opened as a part an evacuation, it is vital to have an understanding of the 5-step process.

Source: Australian Institute of Disaster Resilience, Evacuation Planning Handbook, 2017

## 7.15. Identified evacuation centres

An evacuation centre is designed to accommodate people for short to medium periods of approximately 4 to 6 weeks, although this figure may vary.

An evacuation centre will provide some or all of the following services:

- meals
- beds
- linen
- personal support
- medical services (or access to them)
- assistance accessing finances and recreational activities.

An evacuation centre implies the provision of these services in contrast to an emergency shelter, in which people are expected to be self-sufficient.

For further information on evacuation centres/shelters management, refer to the NT Evacuation Field Guide available on WebEOC.

## 7.16. Register.Find.Reunite registration and inquiry system

Australian Red Cross, in partnership with the Australian Government Attorney-General's Department, has developed an improved system to help reunite families, friends and loved ones separated by an emergency. This system is called Register.Find.Reunite<sup>7</sup>.

This system can be initiated by either the Territory or Regional Controller without the national system being activated. Any activation of this system should occur in consultation with the Welfare Group in the first instance.

## 7.17. Impact assessment

Immediately after an emergency event, there is a need to identify and assess impacts to inform short and long-term recovery priorities. Comprehensive assessment of all impacts is a vital component of emergency response activities. Guidelines for the conduct of rapid assessments in the NT, including the establishment of dedicated Rapid Assessment Teams (RATs) to collect data in the field, have been developed.

The Survey, Rescue and Impact Assessment Group, led by the NTPFES, is responsible for coordinating rapid impact assessments. At the local level, Local Controllers should contact the Survey, Rescue and Impact Assessment Group lead to discuss impact assessments if deemed appropriate.

---

<sup>7</sup> More information can be found at: <https://register.redcross.org.au/>

## 8. Recovery

The coordinated process and measures for supporting emergency-affected communities in the reconstruction of physical infrastructure and restoration of the social, economic and natural environments.

### 8.1. Local Recovery Coordinator and Coordination Committee

When a region and/or Locality has been affected by an event, the Regional Recovery Coordinator may appoint a Local Recovery Coordinator in accordance with section 87 of the Act. The Local Recovery Coordinator will establish a Local Recovery Coordination Committee (LRCC) drawing from membership of the LEC and other relevant members of the community as needed. The Local Recovery Coordinator reports directly to the Regional Recovery Coordinator.

Local Recovery Coordinator and committee functions, powers and directions are established in Division 12 and 13 of the Act respectively.

### 8.2. Transitional arrangements

The transition from response to recovery coordination reflects the shift from the protection of life and supporting the immediate needs of the community to establishing longer term, more sustainable support structures.

The transition to recovery coordination occurs after the completion of the transition checklist and at a time agreed by the Territory Controller and Territory Recovery Coordinator in accordance with the Territory Emergency Plan.

Transition will occur when the Territory Recovery Coordinator is satisfied that the following has occurred:

- the Territory Controller has briefed the TEMC and the Territory Recovery Coordinator
- the Regional Controller has briefed the Regional Recovery Coordinator
- where there is significant changeover of personnel, the EOC planning operations and logistics sections have briefed incoming recovery planning, operations and logistics staff.

The Regional Recovery Coordinator will ensure all functional group leaders, agencies, support groups and other relevant stakeholders are notified prior to the transition to recovery. This notification is to include changes to relevant contact details and other pertinent information.

An example of response and recovery activities can be found at **Annex E**.

## 9. Debrief

Debrief processes embed continuous improvement into the delivery of emergency management activities. Consistent approaches to lessons learned encourage adaptability, and flexibility across all levels of government. Sharing of knowledge and experiences throughout emergency events assists with ongoing continuous improvement of people and organisations involved.

The NTG implements a lessons learned approach recognising the positive impact on organisational culture commensurate with increasing opportunities to achieve emergency management goals. Whilst lessons learned often begins in one agency through an internal debrief process, those lessons learned are transferable across multi-agencies.

During any operational response, personnel involved are encouraged to record activities where there are lessons to be learned. Activities can include decision making and consequential responses. Where decisions are made by an Incident Controller, Incident Management Team (IMT) member or a functional group member, those decisions should be recorded in a Decision Log (WebEOC). Decision Logs can be referred to as part of the debrief process.

## 11. Annexures

Annex A Functional groups - roles and responsibilities

Annex B Functions table

Annex C Prevention, mitigation strategies and action plans for identified hazards

Annex D Evacuation guideline

Annex E Summary of response and recovery activities

## 11.1. Annex A: Functional groups - roles and responsibilities

Functional group	Local contact
Biosecurity and Animal Welfare	Department of Industry, Tourism and Trade (DITT)
Digital and Telecommunications	Department of Corporate and Digital Development (DCDD)
Critical Goods and Services	DITT
Emergency Shelter	Gunbalanya School
Engineering	Department of Infrastructure Planning and Logistics (DIPL)
Medical/Health Services	Gunbalanya Primary Health Centre
Public Health	Gunbalanya Primary Health Centre
Public Information	Department of Chief Minister and Cabinet (DCMC)
Public Utilities	PAWC
Transport	DIPL
Survey, Rescue and Impact Assessment	NTPFES
Welfare	Department of Territory Families, Housing and Communities (TFHC)

Full details on functional group roles and responsibilities are detailed in the Territory Emergency Plan.

## 11.2. Annex B: Functions table

Emergency response and recovery functions with identified agencies/organisation/provider.  
During an event some of these functions may be needed at a local level.

Functions	Agency/organisation/provider responsible
Animal/livestock management	DITT
Broadcasting: What radio stations provide announcements?	ABC
Clearing of essential traffic routes	WARC
Clearing storm water drains	WARC
Clothing and household items	Adjumarllarl Store
Community clean up	WARC
Control, coordination and management	Designated Control Authority
Coordination to evacuate public	NTPF
Critical Goods and Services (protect/resupply) <ul style="list-style-type: none"> <li>• food</li> <li>• bottle gas</li> <li>• camping equipment</li> <li>• building supplies</li> </ul>	DITT, Adjumarllarl Store
Damaged public buildings: Coordination and inspections	WARC, DIPL
Disaster victim identification capability	NTPF
Emergency alerts	NTPFES/BFNT
Emergency catering	WARC, Adjumarllarl Store
Emergency food distribution	WARC
Emergency Operations Centre (EOC), including WebEOC	NTPFES
Emergency shelter. Staff, operations and control	WARC, NTPF/DoE
Evacuation centre - Staffing, operations and control	Welfare Group
Financial relief/assistance	DCMC

Functions	Agency/organisation/provider responsible
Identification of suitable buildings for shelters	TFHC
Management of expenditure in emergencies	Controlling Authority and any activated functional groups at the direction of the Controlling Authority
Medical services	NT Health: Primary and Public Health Care Remote (PPHC), Gunbalanya Primary Health Centre
Network communications (IT): Responders/public maintenance and restoration of emergency communication	Telstra
Personal support	Gunbalanya Primary Health Centre
Power: Protection and restoration:	PAWC
Public messaging during response and recovery.	WARC
Public/Environmental Health (EH) management <ul style="list-style-type: none"> <li>all EH functions including water and food safety</li> <li>disease control</li> </ul>	NT Health; Environmental Health Services Darwin
Rapid impact assessment	NTPFES
Recovery coordination	DCMC
Repatriation	DCMC
Restoration of public buildings	WARC, DIPL
Restoration of roads and bridges (council/territory) excluding railways	DIPL
Road management and traffic control including public Information on road closures	DIPL
Sewerage: Protection and restoration	PAWC
Survey	NTPFES
Traffic control	NTPFES, DIPL
Transport: Commercial and public airport/planes, automobiles, ferries, buses	DIPL
Vulnerable groups	TFHC

Functions	Agency/organisation/provider responsible
Waste management <ul style="list-style-type: none"> <li>• collection</li> <li>• disposal of stock</li> </ul>	WARC
Water (including drinking water): Protection and restoration	PAWC

## 11.3. Annex C: Prevention, mitigation strategies and action plans for identified hazards

### 11.3.1. Road crash

	Hazard	Controlling Authority	Hazard Management Authority
	Road crash	NT Police Force	NT Fire and Rescue Service

A road crash occurs when a vehicle collides with another vehicle, pedestrian, animal, road debris, or other stationary obstruction, such as a tree, pole or building. Road crashes often result in injury, disability, death, and or property damage as well as financial costs to both society and the individuals involved. Emergency services are frequently called on to extricate seriously injured casualties from their vehicles following road crashes. This is achieved by employing space creation techniques to create openings in the vehicle. These openings make it possible to administer first aid to the casualty and to remove them from the vehicle.

A number of factors contribute to the risk of collisions, including vehicle design, speed of operation, road design, weather, road environment, driving skills, fatigue, impairment due to alcohol or drugs, and behaviour, notably aggressive driving, distracted driving, speeding and street racing.

Responses to road crash incidents will be coordinated from the JESCC. NTFRS will respond as per pre determine response arrangements contained within the Intergraph Computer-Aided Dispatch (ICAD) system for incidents occurring within an NTFRS Emergency Response Area (ERA). For incidents occurring outside of an ERA, response will be approved by the rostered NTFRS TDO.

**Prevention and preparative controls include, but are not limited to:**

- radio, television and social media posts
- targeted road safety campaigns
- community engagement strategies
- training in PUASAR024 - undertake road crash rescue delivered by NTES and NTFRS to NTPFES members.

**Public message approval flow:**

- Police Territory Duty Superintendent to approve public messaging and forward to PFES Media and Corporate Communication Unit for dissemination.

### 11.3.2. Storm and water damage

	Hazard	Controlling Authority	Hazard Management Authority
	Storm and Water Damage	NT Police Force	NT Emergency Service

Severe storms are localised events that do not usually affect wide areas, consequently the threat they pose is often underestimated by the community. These storms can occur anywhere in the Territory and do so much more frequently than any other major natural hazard.

On average, each year severe storms are responsible for more damage, as measured by insurance costs, than tropical cyclone, earthquake, flood or bushfire. Unfortunately, storms also kill people; between 5 and 10 deaths are caused by lightning strikes in Australia each year. Deaths also occur when strong winds cause tree limbs to fall, debris to become projectiles and small boats in open water to capsize. In fact, although many people believe that tornados do not occur in Australia, 41 tornado-related deaths have been recorded in Australia.

As the Hazard Management Authority the NTES established, equipped and trained volunteer units, to support response and recovery operations to the impact of storms. Initial control and coordination will be through the NTES TDO.

**Prevention and preparative controls include, but are not limited to:**

- implementation of high risk season preparation initiatives and council clean ups
- radio, television and social media posts.

**Public message approval flow:**

- the Bureau issues a Broadcast warning to NTES TDO
- TDO Notifies Local Controller/NTES Regional Manager
- Local Controller Notifies LEC
- NTES Regional Manager in consultation with the Bureau/DEPWS, Deputy Director NTES, Director NTES, Local Controller will determine recommended plan stages based on information to hand and pre-determined by Local Plan/Hazard Management Plan
- NTES passes recommendations to the Regional and Local Controller to confirm plan stages
- Incident Controller approves public messaging prior to release.
- PFES Media and Corporate Communication Unit or Public Information Group to publish public messaging.

## 11.4. Annex D: Evacuation guideline

The following is to be used as a guide only.

Stage 1 - Decision		
Authority	<p>The Regional Controller will authorise the activation of the evacuation plan.</p> <p>This evacuation plan is to be approved by the TEMC prior to activation.</p>	Regional Controller in conjunction with TEMC
Legal references	The Act and approved Local Emergency Plan. It is recommended that the Minister declares an Emergency Situation under section 18 of the Act, when this evacuation plan is activated.	
Alternative to evacuation? i.e. shelter in place, temporary accommodation on-site/nearby.	If needed residents will be progressively relocated within the community to <location to be determined>.	Local Controller to arrange
Summary of proposed evacuation	<p><b>Decision</b> – made by the Regional Controller when the community have sustained damage during &lt;to be determined&gt; that cannot support residents in situ during recovery.</p> <p>The Local Controller to disseminate information to the community.</p> <p><b>Withdrawal</b> – three stage process:</p> <ol style="list-style-type: none"> <li>1. &lt;location to be determined&gt;; community to the &lt;location to be determined&gt;; to be registered for evacuation to &lt;location to be determined&gt;</li> <li>2. once registered, groups to move to the airstrip assembly area using buses/vehicles</li> <li>3. Red Cross to register check utilising Register Find Reunite.</li> </ol> <p><b>Shelter</b> – evacuees will be encouraged to stay with friends or family. The remainder will be accommodated at an evacuation centre &lt;Location to be determined&gt;</p> <p><b>Return</b> – to be determined once recovery can sustain return to &lt;location to be determined&gt;.</p>	The decision will be informed by additional advice from technical experts, e.g. the Bureau.
Which communities/outstations or geographical area does the evacuation apply to?	<Out stations, Homelands and homesteads>	
Vulnerable groups within the community	The Medical Group will liaise with local health staff and provide information on medically vulnerable people.	Medical Group and Transport Group to action.

	The identified people will be evacuated <at a time to be determined>.	
Community demographics (approx. total number, family groups, cultural groups etc.)	<p>For more information, refer to the Evacuation Centre Field Guide (page 20 section 4.3) which can be found in WebEOC.</p> <p>Examine the demographic breakdown of the community to be evacuated including:</p> <ul style="list-style-type: none"> <li>• the total number of people being evacuated</li> <li>• an estimate of the number of people likely to require accommodation in the evacuation centre</li> <li>• a breakdown of the evacuees to be accommodated by age and gender. For example, the number of family groups and single persons, adult males and females, teenage males and females, and the number of primary school-aged children, toddlers and infants</li> <li>• a summary of cultural considerations, family groups, skin groups and community groups</li> <li>• potential issues that may arise as a result of these groups being accommodated in close proximity to one another</li> <li>• a summary of people with health issues, including chronic diseases, illnesses and injuries.</li> <li>• details of vulnerable clients (other than medically vulnerable), such as the elderly, frail and disabled (and if they are accompanied by support i.e. family members)</li> <li>• details of community workers also being evacuated who may be in a position to support the operation of the evacuation centre. Examples include teachers, nurses, health workers, shire staff, housing staff and police.</li> </ul>	
What is the nature of the hazard?	<To be determined>	
Estimated duration of the potential evacuation?	<To be determined>	

Triggers for the evacuation	<p><b>Example</b></p> <ol style="list-style-type: none"> <li>1. evacuation planning to commence when the Locality is under a &lt;to be determined&gt;</li> <li>2. implement evacuation if the severity and impact has caused major damage and disruption to all services</li> <li>3. elderly and vulnerable people are to be considered for evacuation due to limited health services.</li> </ol> <p>Further details of the intra-community relocation plan are required.</p>	Regional Controller
Self-evacuation	Where possible residents will be encouraged to self-evacuate and make their own accommodation arrangements if they wish to do so. Individuals and families taking this option will be encouraged to register prior to leaving the community.	Local Controller
Responsibility for the coordination Stage 1	Regional Controller Local Controller	
<b>Stage 2 – Warning</b>		
Who has the authority to issue warnings?	<p>The Bureau will issue advice and warnings. All further public information will be approved by the Regional Controller in consultation with the Public Information Group and NTES.</p> <p>The Local Controller will coordinate the dissemination of community level information.</p> <p>A combination of the following will be utilised:</p> <ul style="list-style-type: none"> <li>• broadcasted over radio and television</li> <li>• social media utilising the NTPFS Facebook page SecureNT twitter feed.</li> <li>• loud hailer</li> <li>• door to door</li> <li>• Emergency Alert System.</li> </ul>	Regional Controller to liaise with Public Information Group and NTES
Process for issuing evacuation warnings and other information	At community level, the Local Controller is to appoint a community spokesperson to disseminate up to date situational information at community meetings which are to be held immediately post a convening LEC meeting, at each declared stage of the Local Emergency Plan. A media brief approved by the Local Controller at each LEC meeting, will be announced over the local radio station containing current situational information, relevant safety information, what to prepare, when to self-evacuate, and where to go.	Local Controller

When will warnings be issued (relative to the impact of the hazard)?	Immediately upon a decision to evacuate being made the LEC will commence coordinating residents to prepare for transport.	Local Controller
What information will the messages contain? (What do people need to know?)	To be determined: <ul style="list-style-type: none"> <li>• outline of the proposed evacuation plan</li> <li>• measure to prepare residences</li> <li>• safety issues; not overloading transport</li> <li>• items to bring on the evacuation</li> <li>• arrangements for pets and animals.</li> </ul>	Local Controller Biosecurity and Animal Welfare Group liaison
Responsibility for the coordination of Stage 2	Local Controller/Regional Controller	
<b>Stage 3 - Withdrawal</b>		
Outline	Three stage process: <ol style="list-style-type: none"> <li>1. community residents to &lt;staging area 1&gt;</li> <li>2. &lt;staging area 1&gt; to airport</li> <li>3. airport to &lt;location to be determined&gt; evacuation centre</li> </ol>	
Gunbalanya community to the airstrip	<p><b>Lead</b></p> <ul style="list-style-type: none"> <li>• NTPF</li> </ul> <p><b>Overview</b></p> <ul style="list-style-type: none"> <li>• the community will gather at the &lt;location to be determined&gt; prior to being transported by community buses to the airstrip.</li> </ul> <p><b>Risks/other considerations</b></p> <ul style="list-style-type: none"> <li>• evacuation should be undertaken during daylight hours, if possible.</li> <li>• risks include inclement weather, persons with infectious diseases, vulnerable persons, and frail/elderly persons, chronically ill</li> <li>• estimated time en-route: ___ minutes each way</li> <li>• estimated timeframe overall: ___ hours utilising current resources.</li> <li>• alternate transport options.</li> </ul>	NTPF

<p><b>Assembly area</b></p>	<p>Likely location of evacuation centre: Gunbalanya School</p> <ul style="list-style-type: none"> <li>• capacity up to 100 under cover</li> <li>• up to 200 with additional tents.</li> </ul> <p>Additional resources will be required to host an evacuation centre in the form of tents and bedding. This will also be the point where evacuee registration will take place. Basic services should be provided i.e. drinking water, information.</p> <p><b>Services to be provided</b></p> <ul style="list-style-type: none"> <li>• Red Cross Coordinator: Red Cross</li> </ul> <p><b>Other details</b></p> <p>Evacuee registration. Residents will need to register at &lt;location to be determined&gt; or airport if (self-evacuating) to be permitted access to the evacuation centre at the &lt;location to be determined&gt;.</p>	<p>NTPF/TFHC</p>
<p><b>Gunbalanya community to &lt;location to be determined&gt;</b></p>	<p><b>Lead - NTPF</b></p> <p><b>Example Lead - Transport Group</b></p> <p><b>Overview</b></p> <ul style="list-style-type: none"> <li>• Transport Group has identified commercial operators and the Police Air Section able to provide evacuation assistance.</li> <li>• Total proposed air assets: _____. Commercial operators will be charging commercial rates for their services at a cost of (\$_____).</li> <li>• The operation will begin at _____hrs with the first aircraft, leaving &lt;to be determined&gt; and arriving at _____hrs</li> <li>• The operation will continue throughout the day until all community members are evacuated. It is estimated that all community members can be evacuated by _____hrs (arriving in &lt;to be determined&gt;).</li> </ul>	<p>NTPF/Transport/Logistics</p>

<p>&lt; Location &gt; airport to evacuation centre &lt;to be determined&gt;</p>	<p><b>Lead - Transport Group</b></p> <p><b>Example</b></p> <p><b>Overview</b></p> <ul style="list-style-type: none"> <li>• Buses (Buslink) will be on standby at</li> <li>• &lt;location to be determined&gt; airport from ____am to receive passengers and continue throughout the day transferring to &lt;to be determined&gt; only, as required.</li> <li>• Transport staff will be on the ground at &lt;location to be determined&gt; airport to marshal passengers on buses only.</li> <li>• Buses to be arranged by the Transport Group. Evacuees will be collected from &lt;location to be determined&gt; airport and transported to the &lt;location to be determined&gt;.</li> </ul> <p>A reception team provided by NTPF will meet evacuees and facilitate transport.</p> <ul style="list-style-type: none"> <li>• details &lt;to be determined&gt;</li> <li>• estimated time en-route: ____ minutes</li> <li>• estimated timeframe: possibly ____ hours, dependant on aircraft arrivals</li> <li>• alternate transport options: ____.</li> </ul>	<p>Transport Group</p>
<p><b>End point</b></p>	<p>&lt;location to be determined&gt;</p>	<p>EOC/Welfare</p>
<p><b>Transport of vulnerable members of the community</b></p>	<p>Medical Group to arrange transport of vulnerable people from the community to &lt;location to be determined&gt;.</p>	<p>Medical Group</p>
<p><b>Registration and tracking</b></p>	<ul style="list-style-type: none"> <li>• Welfare Group to activate registration arrangements. Registration will be undertaken by NTPF and will occur at &lt;location to be determined&gt;.</li> <li>• Names of evacuees will be obtained prior to boarding buses.</li> <li>• Where possible details of individuals and families self-evacuating to be obtained on arrival at the &lt;location to be determined&gt; airstrip.</li> <li>• If persons are not registered as evacuees or self-evacuees they will not be provided access to the evacuation shelter.</li> </ul>	<p>Welfare Group/ NTPF</p>

Coordination Stage 3	Regional Controller	EOC coordination.
<b>Stage 4 – Shelter</b>		
Overview	An evacuation centre will be established at the <location to be determined>. The <location to be determined> will be the primary areas used.	
Alternate shelter options	Where possible evacuees will be encouraged to seek alternative accommodation with family, friends or through commercial accommodation.	
Estimated duration of the shelter phase	To be determined	
Arrangements for domestic animals	No domestic animals are to accompany evacuees. Any self-evacuees with domestic animals will be expected to make their own arrangements for the animals.	Advise Animal Welfare
Roles		
• Director	TFHC	Welfare Group
• Deputy Director	TFHC	Welfare Group
• Logistics/planning	EOC	Controlling Authority
• Admin teams	EOC	DCMC/Welfare Group
• Shift manager/s	To be determined – drawn from pool of trained staff.	Welfare Group
• Welfare team	To be determined	Welfare Group
• Facility team	To be determined	
• Sport and Rec team	To be determined	
• Medical team	To be determined. It is likely St Johns volunteers will be requested. Evacuees will be referred to off-site medical services.	Medical Group
• Public health team	To be determined	Public Health Group
• Transport team	To be determined	Transport Group

Evacuation centre set-up	Refer to the evacuation centre template for set-up considerations.	
What strategy will be put in place to close the evacuation centre?	Closure of the evacuation centre will be largely dependent on the extent of inundation and complexity of the recovery process.	
<b>Stage 5 – Return</b>		
Indicators or triggers that will enable a return	(Refer to Recovery action plan for the community) DCMC	
Who is responsible for developing a plan for the return?	Recovery coordination in conjunction with IMT.	
• Transportation	To be determined	
• Route/assembly points en-route	To be determined	
• End point	To be determined	
How will information about the return be communicated to evacuees?	To be determined	
What information needs to be conveyed to the evacuated community members?	To be determined	

## 11.5. Annex E: Summary of response and recovery activities

The following tables list a summary of possible response and recovery activities to be considered following an event.

This table is presented as a guide only, assisting emergency managers with operational decision making, planning and resource allocation. It also highlights the importance of response and recovery coordination working collaboratively.

Activities have been broken down and are listed under either response or recovery for simplicity and ease of use. In practice not all response activities will be completed during the response phase. Likewise not all recovery activities will commence after the transition to recovery.

The post event period of any event is highly dynamic and produces many challenges, both foreseen and unpredicted. Response and recovery coordination must be flexible and able to adapt to the situation as it evolves.

In most cases the points noted in this table and in the ensuing document are outlined in greater detail in functional group or agency plans.

Activity	Response activities	Recovery activities
1. Situational awareness	<ul style="list-style-type: none"> <li>Road clearance teams</li> <li>General public</li> <li>Media reports</li> <li>Survey and rescue teams</li> <li>Impact assessment teams</li> </ul>	<ul style="list-style-type: none"> <li>Contributes to recovery planning through impact assessment data</li> <li>Comprehensive impact assessments</li> <li>Needs assessment</li> </ul>
2. Public Information	<ul style="list-style-type: none"> <li>Public Information Group activation</li> <li>Spokespersons identified</li> <li>SecureNT activated</li> </ul>	<ul style="list-style-type: none"> <li>Continues in recovery</li> </ul>
3. Survey and Rescue	<ul style="list-style-type: none"> <li>Survey teams deploy to designated areas</li> <li>Critical sites surveyed</li> <li>Deploy rescue teams – NTFRS and Territory Response Group provide primary Urban Search and Rescue capability</li> </ul>	<ul style="list-style-type: none"> <li>Survey and impact assessment data used to develop the Recovery Action Plan</li> </ul>
4. Road clearance	<ul style="list-style-type: none"> <li>Road patrol teams deploy and check assigned routes</li> <li>Road clearance to priority sites</li> <li>Assess Stuart Hwy to Katherine (supply route)</li> </ul>	<ul style="list-style-type: none"> <li>Restoration of road networks and bridges</li> <li>Return to business as usual</li> </ul>
5. Emergency accommodation	<ul style="list-style-type: none"> <li>Emergency accommodation and shelter                             <ul style="list-style-type: none"> <li>evacuation centres</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Evacuation centres may continue into recovery.</li> </ul>

Activity	Response activities	Recovery activities
	<ul style="list-style-type: none"> <li>• Provision of resources that will enable people to remain in their homes</li> <li>• Emergency clothing</li> </ul>	<ul style="list-style-type: none"> <li>• Temporary accommodation options</li> <li>• Repatriation planning</li> </ul>
6. Medical	<ul style="list-style-type: none"> <li>• Hospital <ul style="list-style-type: none"> <li>- road clearance to the hospital</li> <li>- damage assessment</li> <li>- increase morgue capacity</li> <li>- divert patients from remote and regional areas</li> <li>- power (fuel) and water supplies</li> </ul> </li> <li>• Medical clinics and field hospitals <ul style="list-style-type: none"> <li>- determine the need for clinics to be opened</li> <li>- assess damage to clinics</li> <li>- deploy field hospital/s</li> </ul> </li> <li>• Medical presence in shelters <ul style="list-style-type: none"> <li>- supplied by the Medical Group</li> </ul> </li> <li>• Ambulance pick up points on key, cleared roads</li> <li>• GP clinics and pharmacies <ul style="list-style-type: none"> <li>- identify GP clinics able to open</li> <li>- identify pharmacies able to open</li> </ul> </li> <li>• Medically vulnerable people <ul style="list-style-type: none"> <li>- support agencies to follow-up and advise the Medical Group</li> <li>- vulnerable people in shelters</li> <li>- support for vulnerable people at shelters</li> </ul> </li> <li>• Care Flight/Royal Flying Doctor Service</li> </ul>	<ul style="list-style-type: none"> <li>• Hospital <ul style="list-style-type: none"> <li>- repair works</li> <li>- business continuity plans</li> </ul> </li> <li>• Department of Health <ul style="list-style-type: none"> <li>- health centres</li> <li>- repair works</li> <li>- reopen other clinics</li> </ul> </li> <li>• Support return of vulnerable people in community.</li> <li>• GP clinics and pharmacies <ul style="list-style-type: none"> <li>- ongoing liaison by the Medical Group</li> </ul> </li> <li>• CareFlight/Royal Flying Doctor Service - resume business as usual</li> <li>• St John Ambulance – resume business as usual</li> </ul>
7. Essential goods and services	<ul style="list-style-type: none"> <li>• Establish emergency feeding and food distribution points</li> <li>• Assessing the damage to suppliers and retailers of critical resources</li> </ul>	<ul style="list-style-type: none"> <li>• Support the re-opening of the private business sector</li> <li>• Monitor levels and availability of essential goods</li> </ul>

Activity	Response activities	Recovery activities
	<ul style="list-style-type: none"> <li>Assess the impact on barge operations and any effect on the ability to supply remote communities</li> <li>Implement interim banking arrangements</li> </ul>	<ul style="list-style-type: none"> <li>Manage logistics arrangements supplying resources to outlying communities</li> <li>Public health inspections (food outlets)</li> <li>Banking sector business continuity arrangements</li> </ul>
	<u>Fuel</u> <ul style="list-style-type: none"> <li>Fuel suppliers and point of sale</li> <li>Manage fuel supplies to emergency power generation</li> </ul>	<ul style="list-style-type: none"> <li>Monitor fuel levels</li> <li>Infrastructure repairs</li> <li>Emergency fuel supplies for recovery</li> <li>Liaise with fuel suppliers, distributors and wholesalers to re-establish long term supply</li> </ul>
	<u>Banking</u> <ul style="list-style-type: none"> <li>Assess damage to banks and ATMs</li> <li>Implement temporary arrangements</li> </ul>	<ul style="list-style-type: none"> <li>Emergency cash outlets</li> <li>Implement long term arrangements</li> </ul>
8. Evacuation	<ul style="list-style-type: none"> <li>Evacuations within community</li> <li>Evacuation out of community</li> <li>Registration</li> </ul>	<ul style="list-style-type: none"> <li>Support services for evacuees</li> <li>Recovery information for evacuees</li> <li>Repatriation</li> </ul>
9. Public health	<ul style="list-style-type: none"> <li>Communicable disease control response</li> <li>Drinking water safety standards</li> <li>Sewage and waste disposal</li> <li>Safe food distribution and advice</li> <li>Vector and vermin control</li> <li>Food and commercial premises</li> </ul>	<ul style="list-style-type: none"> <li>Ongoing in recovery</li> </ul>
10. Utilities	<ul style="list-style-type: none"> <li>Power supply</li> <li>Power generation</li> <li>Water supply</li> <li>Sewerage</li> <li>Emergency sanitation</li> </ul>	<ul style="list-style-type: none"> <li>Restore power network</li> <li>Restore water and sewerage infrastructure</li> <li>Issue alerts until safe to use</li> </ul>
11. Impact assessments	<ul style="list-style-type: none"> <li>Training assessment teams</li> <li>Initial impact assessments</li> </ul>	<ul style="list-style-type: none"> <li>Comprehensive impact assessments</li> <li>Ongoing needs assessments</li> </ul>
12.	<u>Air (airport/airstrip)</u>	<ul style="list-style-type: none"> <li>Monitor repairs and business continuity activities</li> </ul>

Activity	Response activities	Recovery activities
Transport infrastructure (supply lines)	<ul style="list-style-type: none"> <li>• Clear the runway to allow air movements</li> <li>• Establish a logistics hub at the airport</li> <li>• Terminal damage and operational capability assessment</li> </ul>	
	<u>Road</u> <ul style="list-style-type: none"> <li>• Highway and critical access roads damage assessment</li> <li>• Repair work to commence immediately</li> </ul>	<ul style="list-style-type: none"> <li>• Planning and prioritising repair work of all affected key Territory Highways (Stuart, Barkly, Victoria and Arnhem)</li> </ul>
	<u>Rail</u> <ul style="list-style-type: none"> <li>• Rail damage assessment</li> <li>• Outage estimation</li> </ul>	<ul style="list-style-type: none"> <li>• Ongoing liaison with operator to support restoration to business as usual</li> </ul>
	<u>Port, harbour and barge</u> <ul style="list-style-type: none"> <li>• Assess damage to port infrastructure and harbour facilities</li> <li>• Assess the damage to barge facilities</li> </ul>	<ul style="list-style-type: none"> <li>• Repairing infrastructure</li> <li>• Establish alternate arrangements for the supply of remote communities</li> </ul>
